HARRIS' SEEDS

• 1933 •

WHOLESALE PRICE LIST
for MARKET GARDENERS and FLORISTS

BLUE HUBBARD SQUASH

Part of our 1932 seed crop at Moreton Farm

JOSEPH HARRIS COMPANY, INC.

Moreton Farm

COLDWATER, N. Y.

Free Delivery of Seeds

All seeds included **in this price list**, except Peas, Beans and Corn, will be sent prepaid by parcel post, express or freight **at our option**.

Shipments of Peas, Beans and Corn which, alone or including other seeds, weigh 100 lbs. or more will be sent by **freight** prepaid.

Seeds ordered sent by express will be sent at the purchaser's expense.

*On shipments of less than 100 lbs.; if 5c per lb. is added to the price we will pay transportation charges on Peas, Beans and Corn to places in the United States, (except New York State west of Utica and Binghamton where **no extra amount** for transportation charges is required).*

Make Your Order 100 Pounds or More

You will notice we prepay freight charges on all shipments of garden seeds weighing 100 lbs. or more.

If your order does not amount to as much as this it will pay to get your neighbor to order with you so as to get free transportation.

*The above offer to prepay transportation charges does not apply to Potatoes, Fertilizers, Field Seeds, etc. Articles other than seeds which are listed in this price list are to be sent at **purchaser's expense** except where quoted "postpaid."*

About Ordering, Shipping, Etc.

Orders may be sent at any time and goods will be shipped at the time specified on the order.

Freight shipments are now handled by the railroads much more promptly than formerly and we advise having all heavy shipments (100 lbs. or more) sent in that way.

When ordering seeds shipped by freight or express please **be sure to give the name of your nearest freight railroad station or express office if it is different from your postoffice address.**

Quick Service

You can be assured when you send us an order that you will not have to wait and wait for your seeds. During the busy season orders are sent out the day after they arrive, and the fast mail, express and freight service we have now will get them to you quickly and in good order.

Terms and Discounts

Cash with order. When cash is sent **with the order** we allow a discount of 3 per cent which may be deducted from the total amount of the order.

Time payments. To gardeners of established credit and to those who furnish us with satisfactory references we allow the following terms:

Bills for seeds, plants, etc., shipped after January 1st are due and payable August 1st.

Bills for goods shipped after August 1st are due December 1st.

JOSEPH HARRIS COMPANY, Inc.
Coldwater, N. Y.

Dec. 1, 1932.

A Guarantee

HARRIS' SEEDS are so carefully grown and so thoroughly tested before they are sent out we know they are of the highest quality. Nevertheless if any seeds bought of us do not grow or fail to be as represented, we will replace them without charge or return the money paid for them if we are notified **at once**. In other words, every purchaser of Harris' Seeds is protected to the full amount of the purchase price.

There are so many conditions that affect the growth of crops over which we have no control that we cannot hold ourselves responsible for any loss beyond the amount paid for the seeds.

John Boos and Sons of Hicksville, L. I.—Picture shows one of their trucks loaded with Spinach and Beets grown from Harris Seeds. Photo taken Sept. 1932 by Mrs. Boos.

More Money for Vegetables

We think 1933 will be a better year for market gardeners, because, with the undoubted improvement in business, there will be fewer people out of jobs. The low prices in 1932, were not so much due to over-production, as to the lack of money with which to buy. In 1933 they will have more money for vegetables.

But don't forget this: whenever there are not enough buyers to take up the crop, it is the higher grades that have the sure market. So you will be wise in 1933, to make very sure of the quality of the seed you sow. You will find this catalogue a help in selecting the best kinds to grow.

According to Our Tests
96 per cent
of this seed germinates

A label like this is put on every lot of Harris' Seeds that are sold. The figures of course vary.

Every Lot of Seed is Tested

Not only tested, but the *results* of the *test* are shown on a label which is attached to every package or lot of seed sold. This is information that is not given by other dealers. It has been found of great help to those who use Harris' Seeds. By consulting the label you can tell just how thick to sow the seed so as to get an even stand of plants without using an unnecessary quantity of seed which often causes a great deal of time and labor by thinning.

Our Farm

Our big farm is something like a research laboratory. Here we constantly compare old and new strains, and work in the development of improved kinds. Many of our introductions have become standard varieties for growers thruout the country. When you purchase Harris' Seeds you are getting not only the best seeds that money can buy but also the most up-to-date varieties and most carefully bred strains.

We Welcome Visitors and Letters

Come and see us. You will be much interested in the farm—and we are pleasant people to know. If you can't come—and there is any information you want, or any problem on which you would like advice and help—*write to us*. In addition to what we learn on the farm, we meet hundreds of growers every year and we learn from them. *Write FREELY* and you may be sure of a prompt and friendly answer.

OUR GENERAL RETAIL CATALOGUE

Our general retail catalogue is issued in January. It contains other varieties of vegetable and flower seeds not listed in this Price List, also grass seed, small fruits and garden accessories. It will be mailed to our customers and others who ask for it. If you do not receive your copy let us know and we will gladly mail you one.

General Wholesale Price List

The prices here quoted apply only to orders from *market growers, florists and institutions*, who use seeds in considerable quantities. For prices of seeds in quantities less than listed here please refer to our general catalogue.

Artichoke (Ger.)

ARTICHOKE

Carciofo (It.)

The Globe Artichoke produces the flower buds which are used for food the second year after sowing the seed. The plants are not hardy and require protection in winter north of Virginia.

	Oz.	1/4 lb.	lb.
LARGE GREEN GLOBE. The standard variety	\$.50	\$1.50	\$5.00

Spargol (Ger.)

ASPARAGUS

Sparagio (It.)

	Oz.	1/4 lb.	lb.	10 lb.
MARY WASHINGTON. Large, early and vigorous	\$.15	\$.40	\$1.25	\$11.50

A rust resistant variety originated at the United States Dept. of Agriculture at Washington. This is the best of the "Washington" varieties. Very large shoots, early, vigorous and rust-resistant.

ASPARAGUS ROOTS. See page 39.

Bohnen (Ger.)

BEANS

Fagioli (It.)

One pound of beans will plant 150 ft. of row. 60 to 75 lbs. per acre.

Note—30 lbs. or more of one variety will be sold at the 100 lb. rate. A pound is a pint, 15 lbs. a peck, 60 lbs. a bushel. For prices of beans in quantities of less than 7 1/2 lbs. see our general catalogue.

Tendergreen Bean

Handsome, Prolific and Best Quality

The pods are long, rather slender, light green, round as a pencil, stringless and of very high quality, being unusually tender and delicious when cooked.

The vines are very vigorous, strong and productive. The pods mature about the same time as Black Valentine and much resemble that variety in appearance but are far superior in quality.

The Tendergreen is what we have long been looking for—a round *stringless* bean early in production and handsome in appearance and of high quality and yield.

The combination of *high quality*, the heavy yield of handsome, long straight light green pods, the strong growth of the plant and early maturity makes this one of the best green beans for market and roadside stands.

7 1/2 lbs. \$1.60; 15 lbs. \$2.85; 60 lbs. (bu.) \$10.20; 100 lbs. \$17.00.

"Your Tendergreen beans are the best bean I ever raised. My customers like them as well as peas! J. C. Dame, Lakeport, N. Y. Aug. 1, 1932.

"I particularly liked your Tendergreen Beans which ripened in 40 days, were very prolific and of highest quality." Joseph M. Pratt, Flemington, N. J. Feb. 29, 1932.

"I cannot get such seeds around here as I get from you. Tendergreen beans are very fine the best I ever had. Also your Crosby's Egyptian, Long Season Beet and the Ebenezer onion sets." Cecil P. Bowles, Franconia, N. H. June 14, 1932.

Conserva Bean

For Canning and Market

Although this is primarily a fine canning bean, growers have found that it is also of great merit for market and roadside stands where quality counts.

This is a very early variety. The vines produce a large number of pods which are borne in clusters making them very easy to pick. The pods are of medium length, round, straight, entirely stringless and of excellent flavor. The color is medium green.

When canned these beans remain firm yet tender and do not show any discoloration which darker seeded varieties often do.

7 1/2 lbs. \$1.60; 15 lbs. \$2.85; 60 lbs. (bu.) \$10.20; 100 lbs. \$17.00.

Tendergreen Beans

Stringless Black Valentine (Asgrow) Hardy and Prolific

This new bean has all the good points of the old Black Valentine and in addition is of *very high quality* and *entirely stringless*.

When young the pods are nearly round, long, straight and of excellent quality. The pods become somewhat flattened as they grow older.

It is very early and one of the most prolific varieties we know. The large yields of attractive pods make this bean a most valuable kind for the market gardener to grow. If your market wants a green bean you should try Stringless Black Valentine.

7½ lbs. \$1.35; 15 lbs. \$2.40; 60 lbs. (bu.) \$8.40; 100 lbs. \$14.00.

BOUNTIFUL

The Best Flat Podded Dwarf Green Bean

One of the earliest flat dwarf green podded beans. The pods are long, straight and entirely stringless. The vines are extremely productive and this variety has proven a most profitable kind for market growers. We offer our own special stock of Northern Grown seed from disease free fields. *There is no better stock obtainable.*

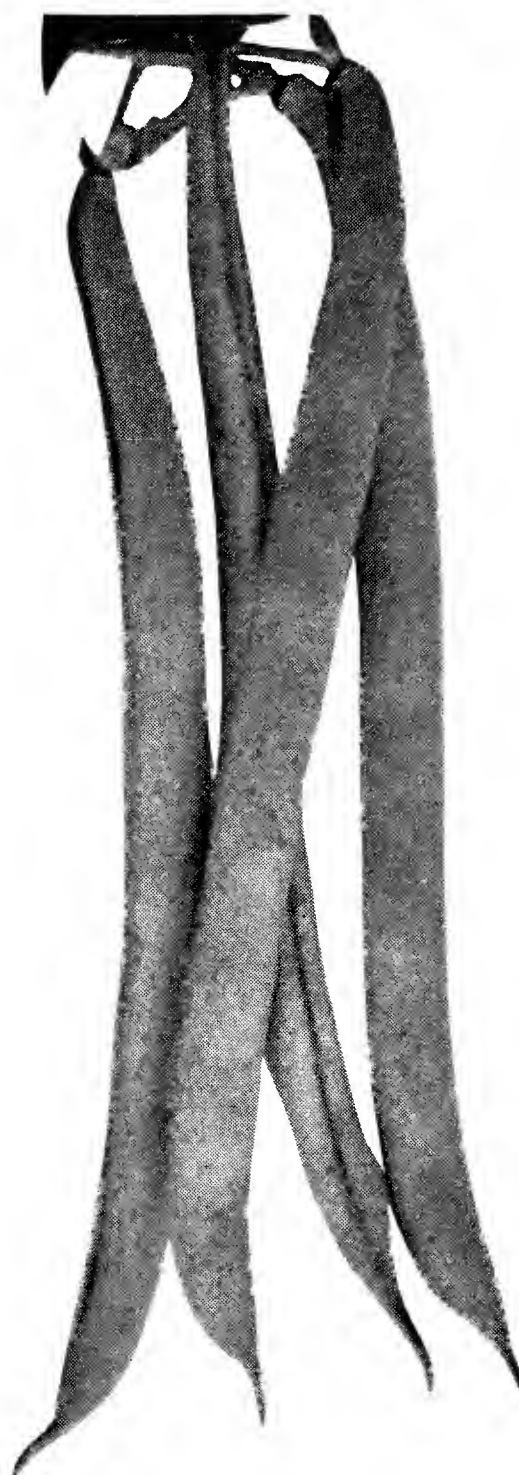

7½ lbs. \$1.35; 15 lbs. \$2.40; 60 lbs. (bu.) \$8.40; 100 lbs. \$14.00.

French Horticultural

We have developed a very fine strain of this popular bean. The vines produce an abundance of long handsome straight pods, heavily splashed with bright red color. We have spent considerable time and effort in selecting this stock to get a high yield of long bright colored pods.

7½ lbs. \$1.60; 15 lbs. \$2.85; 60 lbs (bu.) \$10.20; 100 lbs. \$17.00.

"The French Horticultural Beans purchased from you last year were the finest, largest and best colored beans I have ever grown. Your seed is certainly very fine." W. H. Onthank, Southboro, Mass.

Stringless Black Valentine Beans

Dwarf Green-Podded Varieties

	(Bu.)			
	7½ lb.	15 lb.	60 lb.	100 lb.
CONSERVA —Early and Prolific. See page 2.....	\$1.60	\$2.85	\$10.20	\$17.00
Round light green pods of the highest quality. Early and prolific. Matures large clusters of pods at one time.				
TENDERGREEN —The Best Round Podded Green. See page 2....	1.60	2.85	10.20	17.00
Early and prolific with long round pods of fine quality.				
STRINGLESS BLACK VALENTINE (Asgrow) . See above.....	1.35	2.40	8.40	14.00
This new bean has all the advantages of the old Black Valentine and in addition is <i>entirely stringless</i> .				
BOUNTIFUL . The Best Flat Podded Green. See above.....	1.35	2.40	8.40	14.00
Very early and prolific. Long, flat pods, stringless and of fine quality. One of the best green podded varieties for market and shipping.				
FULL MEASURE	1.35	2.40	8.40	14.00
Long, round stringless pods of high quality, early and a very profitable market variety.				
BLACK VALENTINE	1.20	2.10	7.20	12.00
A profitable market bean. Produces immense crops of long, straight, light green pods, round as a pencil and very attractive in appearance but not stringless.				
New STRINGLESS Refugee	1.35	2.40	8.40	14.00
A stringless strain of the old Refugee.				
Lowe's Champion	1.65	3.00	10.80	18.00
One of the Horticultural or Cranberry beans. Pods 5 in. long, flat, green, straight and stringless.				
Ruby Dwarf Horticultural	1.45	2.55	9.00	15.00
Used for shelling green. Pods light green splashed with deep red.				
FRENCH HORTICULTURAL . See above.....	1.60	2.85	10.20	17.00
The best strain of dwarf Horticultural beans.				

BEANS continued on next page

BEANS—Dwarf Wax Varieties

(Bu.)

7½ lb. 15 lb. 60 lb. 100 lb.

SURE CROP WAX. The Best Flat Wax Bean.	\$1.45	\$2.55	\$9.00	\$15.00
Pods 5 to 6 in. long, flat, straight and bright yellow. They are entirely stringless and are rust-resistant. This is one of the best flat podded wax beans and a most profitable market variety.				
PENCIL POD BLACK WAX—The Best Round Pod Wax.	1.45	2.55	9.00	15.00
Pods perfectly round, nearly straight clear yellow, stringless and of highest quality. Plant healthy and prolific. Matures early. Seed black. We consider this the best round pod wax bean.				
WEBBER WAX or "Cracker Jack." The Earliest Wax Bean.	1.35	2.40	8.40	14.00
The pods are long, straight, flat, stringless and quite free from rust. A heavy bearer.				
WARDWELL'S KIDNEY WAX.	1.30	2.25	7.80	13.00
Very long, flat, deep yellow pods. One of the earliest and most prolific wax beans for market.				
ROUND POD KIDNEY WAX.	1.50	2.70	9.60	16.00
Pods 5 to 6 in. long, round, clear yellow and stringless, medium early and fairly prolific.				
Brittle Wax.	1.50	2.70	9.60	16.00
Same as Round Pod Kidney Wax.				
Davis' White Wax. Hardy and prolific.	1.30	2.25	7.80	13.00
White seed. Long, flat, yellow pods of fair quality. Matures early.				
Hodson Wax.	1.30	2.25	7.80	13.00
Late, very prolific, long, straight, flat pods.				

LIMA BEANS—Dwarf or Bush Varieties*A pound of Dwarf Lima seed will plant 150 ft. of row. About 60 lbs. per acre. (Bu.)*

7½ lb. 15 lb. 60 lb. 100 lb.

FORDHOOK BUSH LIMA. Best For Market.	\$2.55	\$4.80	\$18.00	\$30.00
The most popular bush Lima. Beans large, thick and deep green. The best of this class.				
BURPEE'S BUSH LIMA, Wonder Strain.	1.80	3.30	12.00	20.00
Large, flat beans, medium early.				
Burpee's IMPROVED Bush Lima.	2.30	3.60	13.20	22.00
Larger pods and thicker beans than the old variety and of deeper green color.				
Henderson's Bush Lima.	1.45	2.55	9.00	15.00
Small flat pods and beans, early and very prolific.				

"I wish you could see these Fordhook Lima beans of yours compared with some we bought of somebody else. They are the best I ever saw. B. & J. Lorenzen, Ridgewood, N. J. June 18, 1931.

LIMA BEANS—Pole*A pound of Pole Lima seed will plant 100 ft. of row or about 80 hills. (Bu.)*

7½ lb. 15 lb. 60 lb. 100 lb.

IDEAL—The Best Mammoth Podded Pole Lima.	\$1.80	\$3.30	\$12.00	\$20.00
Very large pods often 8 in. long, early and prolific. We regard this the best large podded Pole Lima.				
Challenger Lima. (Potato Lima)	1.80	3.30	12.00	20.00
An improved strain of Dreer's Pole Lima. Large plump beans of the "Potato" class.				

OTHER POLE BEANS*A pound of Pole Bean seed will plant 120 ft. of row or about 100 hills. (Bu.)*

7½ lb. 15 lb. 60 lb. 100 lb.

SCOTIA. Fine for Wayside Market.	\$1.80	\$3.30	\$12.00	\$20.00
Long, slender, green pods of the very best quality. Wonderfully prolific.				
Golden Cluster Wax.	1.80	3.30	12.00	20.00
Long, broad, deep yellow pods of finest quality; beans white. Pods often 7 in. long and an inch broad.				
Kentucky Wonder, also called "Old Homestead"	1.35	2.40	8.40	14.00
Long, slender, green pods of fine quality. Early and very prolific.				
Kentucky Wonder Wax.	1.50	2.70	9.60	16.00
Long, flat, yellow pods of fine quality. One of the best wax pole beans.				
White Dutch Runner.	1.80	3.30	12.00	20.00
Very large white beans often used in place of Limas. Very prolific and early.				
Scarlet Runner.	1.95	3.60	13.20	22.00
Used principally as an ornamental vine.				
KING HORTICULTURAL or Speckled Cranberry.	1.80	3.30	12.00	20.00
Much superior to the old London Horticultural. Earlier, longer pods of brighter color and stringless.				

MORETON FARM, COLDWATER, N. Y.

Date.....193

Please state below whether you
raise vegetables for home use or
market.

[illegible]

FIELD BEANS

Sow about 60 lbs. of Field Beans per acre.

	7½ lb.	15 lb.	(Bu.) 60 lb.	100 lb.
BOSTON MARROW or White Marrowfat (Perry Strain)	\$1.05	\$1.50	\$3.60	\$ 6.00
<i>The best strain of this variety. Large plump white beans.</i>				
RED KIDNEY—California Grown	1.20	1.80	4.80	8.00
<i>Large red beans, very prolific and a profitable variety. Special disease resistant strain. Grown especially for us in California from carefully rogued fields.</i>				
White Kidney	1.20	1.80	4.80	8.00
<i>Large, white, kidney-shaped beans; yield heavy crops and are of the highest quality for baking.</i>				
Robust Pea Beans	1.00	1.43	3.30	5.50
<i>A select strain of Pea beans that is resistant to the mosaic disease and yields much more.</i>				
IMPERIAL or PROLIFIC TREE. Heavy yielder, finest quality	1.10	1.65	4.20	7.00
<i>The beans are white, kidney-shaped, somewhat smaller than White Kidney and of higher quality. Yields heavy crops and is resistant to disease.</i>				
Yellow Eye	1.08	1.60	3.90	6.50
<i>Large plump white beans with a yellow blotch at the "eye."</i>				

Ruebe (Ger.)

BEETS

Barbabietole (It.)

¼ lb. of seed will sow about 250 ft. of row. Sow 10 lbs. of seed to the acre (for rows 18 in. apart.)

For late fall and winter use it is best to sow the seed about the middle of July in the North and a little later further South.

Harris' Special

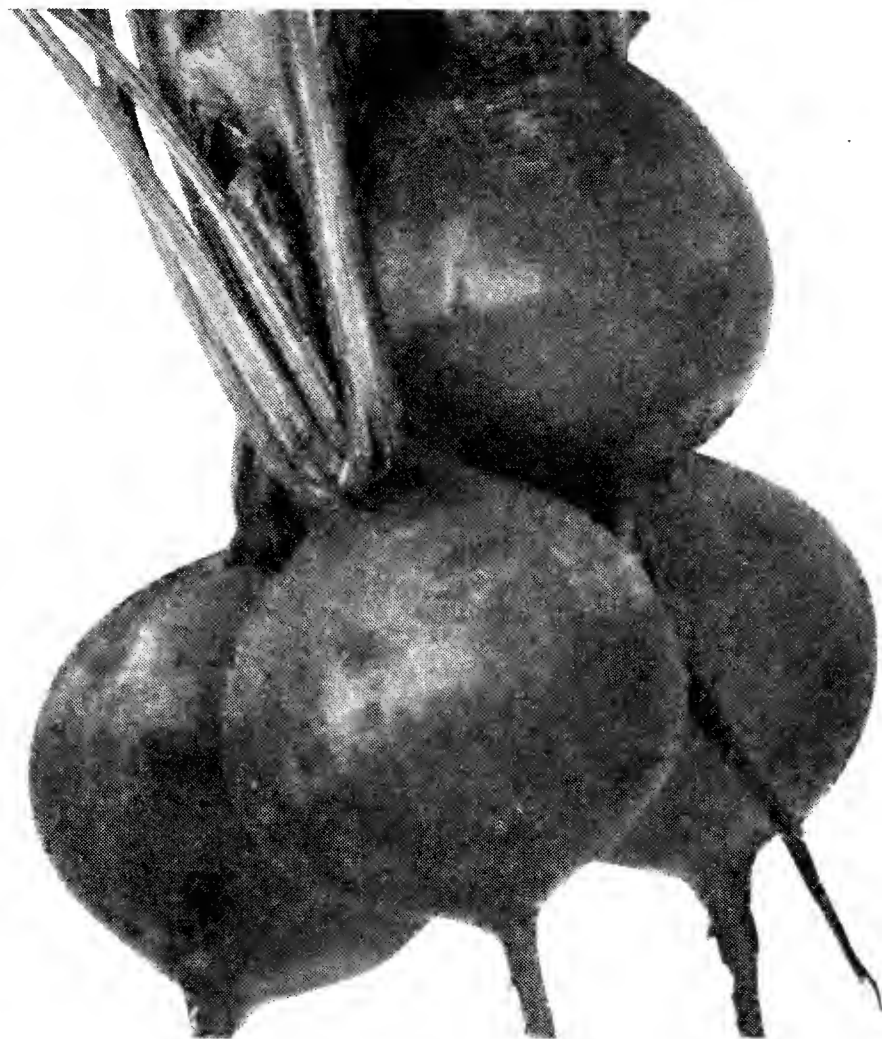

Detroit Dark Red Beet

The Detroit beet is used more extensively for canning than any other variety. The beets are perfectly round or globe shaped, and have slender tap roots. The color is deep red with but faintly defined rings which disappear entirely when the beet is cooked. The quality is exceptionally fine, the young beets being very sweet and without toughness.

Market growers find this an exceptionally fine beet for late summer and fall bunching.

Our special strain produces beets that are much more uniform in shape and color than the strains usually sold. We can confidently state that there is no better strain to be obtained at any price.

¼ lb. 30c; lb. 95c; 10 lbs. or more 85c per lb.

Detroit Dark Red Beets

Harris' Special Crosby's Egyptian Beet

The Finest Beet For Market

Particular gardeners who want the *very finest* beets both in shape and color, have found this special stock to be the best obtainable.

The seed is of our *own growing* and the most careful selection has been practiced for more than thirty years until now we have a strain that is practically "fixed" so that the beets come all alike, nearly *every one a model for shape and color*.

The beets are of globe shape, very deep red, perfectly smooth and with very small tap roots. The tops are unusually small. This beet grows very rapidly and is ready for market as early as any other kind we know of. It is much earlier than Detroit Dark Red and Early Blood Turnip. It is just as early as Early Wonder and grows more uniform in shape and color.

This is the finest strain of Crosby's Egyptian beet obtainable no matter what price is charged for the seed.

¼ lb. 40c; lb. \$1.15; 10 lbs. or more at \$1.00 per lb.

"I have used Harris' strain of Crosby's Egyptian beet for about a dozen years and it is consistently very true to type and variety." Dwight Cowles, Salisbury, Conn. Feb. 11, 1932.

BEETS continued on next page

BEETS—continued

	$\frac{1}{4}$ lb.	lb.	10 lb.
CROSBY'S EGYPTIAN, Harris' Special Strain. (See description on page 5) The finest bred strain of this beet. Deep red color.	\$.40	\$1.15	\$10.00
CROSBY'S EGYPTIAN, Bright Red Strain Color lighter red than Harris' Strain. Popular in some markets.	.25	.80	7.50
EARLY WONDER. A Superior Strain. Quite similar to our special strain of Crosby's Egyptian. Early and of good deep red color. Our strain of this variety is very fine.	.40	1.15	10.00
Egyptian Blood Turnip Flatter than Crosby's and is preferred by some for early bunching.	.25	.80	7.50
DETROIT DARK RED, Harris' Special Strain. (See description on page 5) Seed of our own growing, very superior stock.	.30	.95	8.50
Eclipse Early, globe-shaped and very handsome beet, of somewhat lighter color than Detroit but earlier.	.30	.85	8.00
Early Blood Turnip A good old variety, large flat beets.	.30	.85	8.00
LONG SMOOTH BLOOD RED 8 to 10 inches long and very dark red. Grows half out of the ground.	.30	.85	8.00
LONG SEASON A very late variety of extra fine quality. Not of good shape for general market purpose, but excellent for the roadside stand where quality counts. See full description in our Retail Catalogue.	.70	2.25	21.50

MANGELS AND SUGAR BEETS—For Stock

Six to eight pounds of seed will sow an acre.

	$\frac{1}{4}$ lb.	lb.	10 lb.
DANISH YELLOW GIANT—The Heaviest Yields An immense yielder. Very large, oval, deep yellow and rich. Flesh white.	\$.20	\$.45	\$ 4.00
Golden Tankard. Deep yellow flesh Oval and easily harvested; yellow flesh. The strain we offer is very fine.	.20	.45	4.00
NEW "HALF SUGAR" MANGEL Intermediate between a sugar beet and mangel. Yields immense crops of beets rich in sugar.	.20	.45	4.00
MAMMOTH LONG RED Very large, long red roots of good quality. One of the best yielders and keeps well.	.20	.45	4.00
Giant Yellow Eckendorf Very large yellow mangel with white flesh. Blunt at the bottom, easily harvested and immense yielder.	.20	.45	4.00

Rosenkohl (Ger.)

BRUSSELS SPROUTS

Cavolo di Brussells (It.)

Cultivation is the same as for cabbage or cauliflower. 1 oz. of seed will produce about 3000 plants.

Long Island Improved Brussels Sprouts—Special Strain

We are pleased to be able to offer a very fine strain of Long Island Improved Brussels Sprouts that produces a high percentage of firm, large sprouts so that the yield is high. The plants are not tall but the stems are completely covered with large and very firm sprouts. Growers find this a very profitable strain to use. Oz. 60c; $\frac{1}{4}$ lb. \$1.90; 1 lb. \$6.50.

Italian Green Sprouting Broccoli

BROCCOLI

Italian Green Sprouting
(Calabrese)

This vegetable has become very popular, and commands good prices in most markets.

The culture of Broccoli is the same as cauliflower. It produces a central head which when cut out allows side sprouts to grow up and head. These can be cut continuously thruout the late summer and fall making it a most profitable crop to grow.

Our seed is of the true Italian Calabrese strain producing large compact heads.

Price: $\frac{1}{4}$ oz. 25c; oz. 75c; $\frac{1}{4}$ lb. \$2.15; 1 lb. \$7.50.

Blumenkohl (Ger.)

CAULIFLOWER

Cavolflore (It.)

One oz. of seed will produce 1500 to 2000 plants in open ground or about 3000 in frames.

Wm. Scorse and Son, Rochester, N. Y. in their crop of Harris' Super Snowball Cauliflower. Photo taken Aug. 6, 1932.

Super Snowball Cauliflower

This is the earliest cauliflower with good large firm heads. The heads form *ten days to two weeks earlier* than Snowball. This is a distinct advantage as early cauliflower nearly always brings higher prices than the late crop. Super Snowball heads more uniformly than any strain of Snowball we know of. 90 per cent of the plants produce fine large heads within two weeks from the time the first heads mature. The plants are very strong and vigorous, having large, distinctly characteristic leaves which curl over the head to give protection from the sun.

We regard this as the most pronounced improvement made in cauliflower in many years and many gardeners have found it a very profitable kind to raise.

A word of caution is necessary, however. The heads of this variety, as we have said, mature nearly at the same time. Should the weather condition just at this time be favorable, a wonderful crop of large handsome heads will result. But if the weather happens to be unfavorable when the heads form, a larger part of the crop will be affected than would be the case with another variety which matured over a longer period of time. For this reason it is well not to depend entirely on one strain. We therefore advise using Super Snowball for part of the acreage and Snowball or Erfurt Early Dwarf for the balance.

1/4 oz. 85c; oz. \$2.75; 1/4 lb. \$9.50; lb. \$35.00.

"The seeds received from you have been most satisfactory and your Super Snowball Cauliflower the finest I have ever grown." S. V. Bennet, Middlebury Center, Pa. Aug. 23, 1932.

Snowball Cauliflower—Perfected Strain

This is the variety which is most generally grown as the main crop cauliflower. Our Perfected Strain is the finest of this kind which we know of. The plant is dwarf and compact, the heads are large and solid, snow white and with no protruding leaves under average conditions.

We can confidently state that seed we offer is the finest strain obtainable and there is no use paying more than we charge as no better can be bought at any price.

Price: oz. \$1.85; 1/4 lb. \$6.25; lb. \$22.00.

	Oz.	1/4 lb.	lb.
SUPER SNOWBALL. See above..... (1/4 oz. 85c)	\$2.75	\$9.50	\$35.00
The earliest and heads most uniformly.			
SNOWBALL, Perfected Strain. See above.....	1.85	6.25	22.00
A very fine improved strain of the true Snowball type.			
CATSKILL SNOWBALL	1.85	6.25	22.00
A fine strain of Snowball grown extensively in the Catskill Mountain region. Matures early and the heads are very compact and uniform.			
DANISH PERFECTION. For late market	1.90	6.50	23.00
A strain of Snowball Cauliflower with more leaves to cover the head, which does away with tying to some extent. Heads very solid and without protruding leaves. Matures a week later than Snowball.			
Danish Giant Snowball or "Dry Weather"	1.90	6.50	23.00
Ten days or two weeks later than Snowball and of more vigorous growth and stands drought better.			
ERFURT EARLY DWARF. Madsen's Stock No. 3	1.85	6.25	22.00
Much like Snowball, but has somewhat shorter stems and matures a little earlier. This strain has proven the best in several trials made here in New York State.			
ITALIAN PURPLE. Grow some of this kind (1/4 oz. 55c)	1.85	6.25	...
This is a true cauliflower, but the heads are purple tinged and do not require tying. The demand for these cauliflower far exceeds the supply. Our strain runs over 75% purple heads.			

Kraut (Ger.)

CABBAGE

Cavolo capucci (It.)

One ounce of seed will produce 1500 to 2000 plants in open ground or about 3000 in frames. It requires 4 to 6 oz. of seed to produce plants for an acre of ground.

Early Varieties

Golden Acre Special

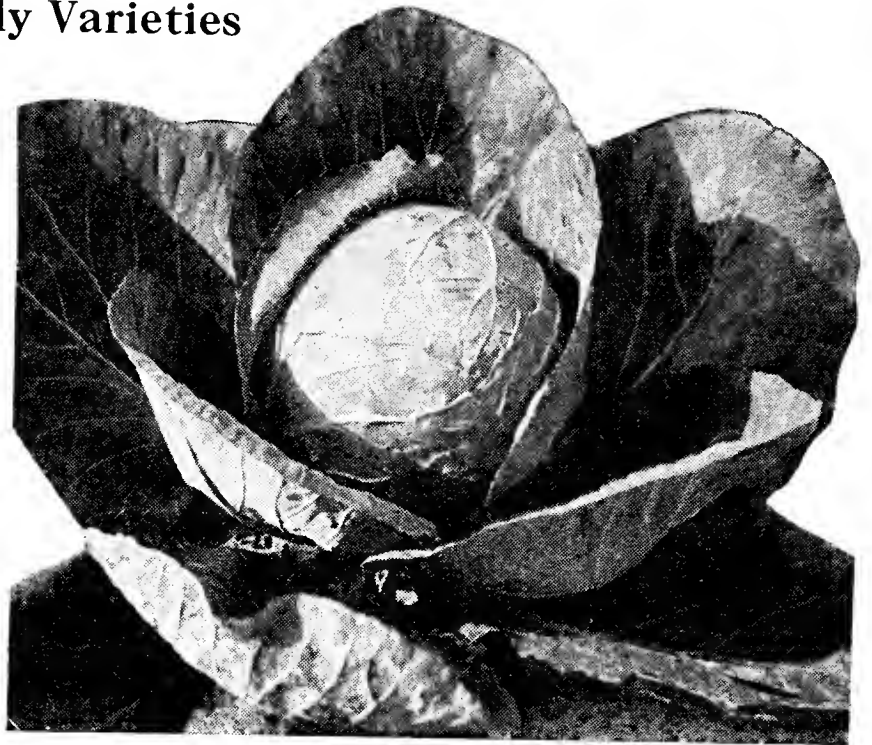

This is by far the best strain.

We have offered this Special Strain for several years and it has met with favor by growers because of its extreme earliness great uniformity of shape and size and even time of maturity.

This strain has been bred so that practically all the heads are round, very compact, just alike and mature all at the same time. The plant has but few outside leaves and the heads form very early, so that more plants can be set to the acre and a large crop can be harvested before any other kinds are ready.

Growers will find this special strain a profitable one to use.

Golden Acre Special. Oz. 80c; $\frac{1}{4}$ lb. \$2.60; lb. \$9.00.

Golden Acre Cabbage

"Your special strain of Golden Acre Cabbage was excellent last year, being more uniform than any I have grown before." G. Arthur Siebke, Vincentown, N. J. Dec. 24, 1931.

	Oz.	$\frac{1}{4}$ lb.	lb.
GOLDEN ACRE—The Earliest Cabbage.	\$.45	\$1.20	\$4.00
Matures a week <i>earlier</i> than Jersey Wakefield. The heads are round and very uniform, every plant making a good head. They resemble a fine type of Copenhagen Market although smaller, are very firm and a good bright green in color. This variety has proved very profitable for the first early crop.			
GOLDEN ACRE. Special Strain. See above.....	.80	2.60	9.00
This special strain is more uniform in shape and maturity than any other.			
EARLY JERSEY WAKEFIELD. Early Pointed Heads.25	.75	2.50
The standard early variety. Heads pointed, of medium size and very hard. Our strain is particularly fine, the heads being very uniform and early.			
COPENHAGEN MARKET.30	.90	3.00
Our strain is earlier and more uniform than usual strains of this variety. Heads round, hard and have few outside leaves. Larger but about 10 days later than Golden Acre.			
LARGE LATE COPENHAGEN. Best for Kraut. (See below).....	.35	1.10	3.50
New strain of Copenhagen Market with much larger heads.			
ENKHUIZEN GLORY. Originators Strain.25	.70	2.25
A very large, Medium early cabbage. Heads as large as the late kinds and mature much earlier. Has proved to be a most profitable variety for market and kraut.			
Burpee's All Head Early.25	.75	2.50
Heads flat and of good size. Medium early. Used for main crop, for fall market and shipping.			

Large Late Copenhagen

Large Late Copenhagen

Best for Kraut

This new strain of *Copenhagen Market* will prove to be the best strain of cabbage for kraut. The heads are much larger than the old *Copenhagen*, growing 10-12 in. in diameter.

The heads are larger than well grown *Enkhuizen Glory*. They mature a week earlier than *Glory* and remain hard without splitting for a long time. In our trials this year every plant made a good big solid head of fine kraut cabbage. If you are looking for heavy tonnage grow some *Large Late Copenhagen*.

Oz. 35c; $\frac{1}{4}$ lb. \$1.10; lb. \$3.50.

CABBAGE—Late or Main Crop Varieties

	Oz.	¹ / ₄ lb.	lb.
MIDSEASON MARKET. Heavy Yielder.	\$.35	\$1.00	\$3.25
A new cabbage which has proved one of the most uniform and heaviest yielding medium early varieties grown. The heads are almost perfectly round, large and solid. We highly recommend this variety for market, shipping and kraut.			
DANISH BALLHEAD. Short Stem.30	.85	2.75
Has proved to be a very heavy yielding strain of Danish cabbage. The heads are large, solid and of good deep green color.			
HARRIS' BALLHEAD. The best strain of Short Stem.60	1.75	6.00
This strain of our Own Growing is the best we know of. Heads are medium size, deep, very solid and very uniform in shape.			
HOLLANDER. Heavy yielder. Long keeper.35	1.10	3.50
A very fine strain of Danish cabbage with short stems, medium size round heads which are extremely firm and retain their green color unusually long in storage. A heavy yielder.			
DANISH BALLHEAD. Intermediate.30	.85	2.75
Heads are deeper and not as flattened as the short stemmed. The color is deeper green and they keep very well in storage. A profitable type to raise.			
Surehead.25	.70	2.25
Deep, heavy heads. A good late variety.			
SUCCESSION.25	.70	2.25
A popular cabbage for fall market. Large flat heads.			
All Seasons.25	.70	2.25
Large flat heads.			
Volga.25	.70	2.25
The heads are large, round and solid; a heavy cropper.			
Premium Flat Dutch.25	.70	2.25
Old standard kind. Large, heavy head.			
Winningstadt.25	.70	2.25
Pointed heads of medium size.			
MAMMOTH ROCK RED. Surest Heading Red.30	.90	3.00
The largest red cabbage. The heads are hard, round and deep red. This is one of the best red kinds for market or shipping, and our strain is especially fine.			
SAVOY. Perfection Drumhead.30	.85	2.75
Heads are large of fine quality and quite firm. The color is a deep green, and the leaves are very much curled. Matures late and keeps all winter. This is an excellent strain for market and roadside stand.			

Carroten (Ger.)

CARROTS

Carota (It.)

An ounce will sow about 300 feet of row. It requires 2 to 4 lbs. of seed for an acre, depending on how far the rows are apart.

Carrots often prove very profitable. They do best on muck or soil of that nature, although very good crops are raised on sandy loam. For late fall market the seed is usually sown in June or first of July. If small carrots for bunching are wanted the seed may be sown as late as August 1st in the North and later further South.

New Red Cored Chantenay Carrot

Growers who have tried this new "Coreless" Chantenay carrot have been well pleased with it, many getting higher prices for it than for their ordinary carrots.

The carrots are just the same as a good strain of Chantenay but with the difference that the deep color extends all through the root so there is no light colored core.

It is especially valuable for soup makers as the deep orange red color makes a better looking product than can be made from the old strain with a light colored core.

The roots are as long as the Chantenay which is usually sold, averaging 6 in. long, very smooth and symmetrical and of deep orange red color all through.

Our strain will be found exceptionally fine. It is over 90 per cent true coreless, smoother and more uniform than other strains which we have seen.

¹/₄ lb. 45c; 1b. \$1.50; 10 lbs. \$14.00.

"I have been very much pleased with the Red Cored Chantenay carrot seed I received from you this season. It has produced wonderful carrots of fine quality." H. S. Van Tuyle, Pittston, Pa. July 19, 1932.

Red Cored Chantenay Carrots

CARROTS—continued

Chantenay Carrot—Special Strain

This is at present the most popular carrot for the general market. The roots grow 6 to 7 in. long, taper slightly and are quite square or stump rooted at the bottom. The color is deep orange and the roots are very fine grained and smooth. The stock we offer grows about *one inch longer* than the usual strains of this variety and *is without doubt the finest strain of Chantenay Carrot we have ever seen.*

$\frac{1}{4}$ lb. 40c; lb. \$1.25; 10 lbs. \$11.00.

"Please send me by return mail 10 lbs. of Chantenay carrot seed. If it is as good as what I got in the spring. I will be more than satisfied." W. Harkins, Ivyland, Pa. July 7, 1932.

	$\frac{1}{4}$ lb.	lb.	10 lb.
CHANTENAY. "A Superior Strain." See above.....	\$.40	\$1.25	\$11.00
The most popular market variety, 6 to 7 inches long, stump-rooted, deep orange color and very smooth. The strain we offer grows an inch longer than ordinary strains.			
CHANTENAY, Red Cored. See page 9.....	.45	1.50	14.00
This new strain is really a "Coreless Chantenay."			
TENDERSWEET—The Sweetest Carrot.....	.85	2.85	26.00
This new carrot is the best quality we know of. The color is striking, being deep reddish-orange outside and in, and with distinct red marking in the base of the leaves. Grows 7-8 in. long, somewhat tapering, and smooth.			
DANVERS HALF LONG. A heavy cropper.....	.40	1.25	11.00
Grows 6 to 7 in. long, deep orange color, not quite as smooth as Chantenay.			
PRIDE OF DENMARK.....	.55	1.75	16.50
A wonderfully fine carrot growing 8 to 9 in. long and 2 to 3 in. through, being practically the same size the whole length. It closely resembles the Hutchinson but has less core and deeper color. Yields well.			
NANTES—Coreless.....	.40	1.25	11.00
One of the best "coreless" varieties, 6 to 7 in. long the same size the whole length, and stump rooted. Color deep orange and "coreless."			
CORELESS or Amsterdam Forcing.....	.55	1.75	16.50
The carrots grow about 5 to 6 in. long and 1 to $1\frac{1}{2}$ in. through and the same size the whole length. The end is blunt and with very fine rat-tail root. The color is deep orange red all through the root including the core. This is a beautiful carrot for bunching or to market in bulk.			
PERFECTION. A larger "Coreless".....	.55	1.75	16.50
A new carrot, similar to Amsterdam Forcing, but are larger being 6 to 8 in. long. They are practically the same size the whole length, <i>coreless</i> and very smooth. A fine carrot for fall market.			
HUTCHINSON. Finest market garden strain.....	.85	2.75	25.00
The roots are 8 to 9 in. long, nearly the same size the whole length and stump-rooted. Color deep orange. This carrot yields large crops and is used extensively for busheling.			
OXHEART or Guerande.....	.30	1.00	9.00
Short, thick carrots, used for bunching and table use. Very easily pulled. About 4 inches long, deep orange yellow, and of fine quality.			
MASTODON or WHITE VOSGES.....	.25	.75	6.50
Large, white carrot for stock feeding. Immense yielder. 8 to 10 inches long.			
Long Orange.....	.30	.90	8.00
Roots a foot long, yields large crops.			
Early French Short Horn.....	.40	1.25
For forcing. About 3 inches long; very early.			

CHINESE CABBAGE

Chinese cabbage has proved to be a very profitable crop for muck as well as up land. There is a good demand for it in New York and other large markets in carload lots. The seed is sown in July or August and the crop matures in eight to ten weeks.

	Oz.	$\frac{1}{4}$ lb.	lb.
CHIHILI—Much the Best Variety.....	\$.30	\$.90	\$3.00
The earliest and surest to head. The plant produces long solid cylindrical heads of fine quality which are often 18 inches long. The <i>large solid attractive</i> heads make this absolutely the best kind to grow for market and the roadside stand.			
Pe-Tsai.....	.25	.75	2.50
Large heads. 18 to 20 in. high.			
Wong Bok.....	.25	.75	2.50
Short compact heads of fine quality.			

CHICORY

WITLOOF or FRENCH ENDIVE. We have a very fine strain of this popular salad plant. For description and price of seed see under Endive. Page 19.

Feld salat (Ger.)

CORN SALAD or Fetticus

Valeriannt (It.)

	Oz.	$\frac{1}{4}$ lb.	lb.
LARGE ROUND-LEAVED. Market Gardener's Strain.....	\$.15	\$.35	\$1.20
Leaves are uniformly broad and dark green, and yield large crops.			

Sellerie (Ger.)

CELERY

Sedano (It.)

An ounce of seed will produce about 8000 plants. It requires 20,000 plants to the acre.

For very early planting the seed should be sown in February or first of March. For late crop the seed is sown in the open ground as early as possible. Great care must be taken not to cover the seed too deep. More failures to get the seed to germinate are due to this cause than any other.

Golden Plume or Wonderful

The Best Yellow Celery

We have a very superior strain of this popular celery which is now rapidly taking the place of other varieties. We consider this the finest all around celery of the "blanching" type in existence. The stalks of our special strain are *very large* with remarkably *heavy hearts* and with *thick solid stems*, *unusually long* between the root and first joint. There is not one green stalk in a thousand and no soft ones. This strain is quite *blight-resistant*. Often where other kinds are badly affected with blight or rust this strain of Golden Plume will be found in the same field perfectly healthy and entirely free from blight.

The seed we offer is "**proved.**" That is a crop of celery has been raised from it so we *know* just what it produces. We have never seen better celery than the crops produced from this strain.

The seed is of strong germination and we can confidently recommend it. There is no finer strain obtainable *at any price*.

Oz. \$1.00; ¼ lb. \$3.40; lb. \$12.00.

"I think I have grown as much celery as any man in America, and all I have to say is that your statement on page 8 of your Market garden catalog (1932) is correct to the letter. I have never seen more "blight resistant, hardier, and all round better celery than your strain of Golden Plume. Be sure and save me 2 lbs. of the same seed." Sam de Boer, Westboro, Mass. Aug. 1, 1932.

Golden Plume or Wonderful Celery Grown from Harris' Seed
by C. F. Duerr, Irondequoit, N. Y.

Yellow or "Self-Blanching" Varieties

	Oz.	¼ lb.	lb.
GOLDEN PLUME or WONDERFUL. Proved Seed. See above.....	\$1.00	\$3.40	\$12.00
We have a very fine strain of Golden Plume which will be found equal if not superior to any sold, even at much higher prices.			
GOLDEN SELF-BLANCHING. "Old" Strain75	2.35	8.00
The same as has been raised for many years. The stalks are large, rather short and form large heavy hearts.			
GOLDEN SELF-BLANCHING. "New" Strain75	2.35	8.00
Grows very rapidly and is strong and healthy, resisting blight well. Some growers think it is too tall for late crop and storage, but for the early crop it is preferred.			
GOLDEN PHENOMENAL. Proved Seed	1.25	4.25	15.00
This is the largest strain of Golden Self Blanching. It resembles Golden Plume but is a little longer from the first to second joints. Very large fine celery can be grown from this variety.			

CELERY continued on next page

Harris Customers are our best advertisement. We are proud of the many letters of the same tenor as those below which we receive each year.

"Enclosed please find check for my 1932 seeds for which I am very much pleased and satisfied, as they are by far the best seeds obtainable. I was pleased to see your exhibit at Waltham last Wednesday, Aug. 3d. and heard many favorable remarks of the splendid quality of your seed. You will hear from me early in the 1933 season." P. T. Ross, Hudson, Mass. Aug. 8, 1932.

"I have used Harris' Seeds for 20 years, I would use no other." Geo. E. Leasure, Cumberland, Md. Feb. 12, 1932.

"I was well pleased with everything bought from you last year and want to thank you for your prompt and courteous service." Edwin C. Borton, Holland, Ohio. Jan. 29, 1932.

CELERY—continued

Salt Lake

The Best Green Celery

This new green celery is just what we have long been looking for—an almost perfect green celery for winter storage. Growers who have had it the last three years have been very enthusiastic about it as it supplies a long felt need for a fine green celery.

The plant grows to a good height, not too tall, and makes a well developed and heavy heart. The individual stalks are *very thick*, crisp and of high quality. They blanch more quickly than other green varieties. In one field we examined several thousand heads as they were being dug but could not find a soft one.

We highly recommend this new celery for winter use and storage.

Oz. 75c; ¼ lb. \$2.35; lb. \$8.00.

"I am sending you these few lines to say I am very well pleased with your celery seed. 'Salt Lake' it is everything you claimed it to be. At present I have it around 2¼ lb. to 2½ lb. and very crisp." Ivan DeYoung, St. Catharines, Ont., Canada. Oct. 7, 1932.

Harris' Celery Plants

We can supply early frame grown plants, or field grown plants for later planting. They are well grown and true to name. See page 39 for varieties and prices.

Salt Lake Celery

	Oz.	¼ lb.	lb.
EASY BLANCHING or Sanford Superb.	\$.60	\$1.75	\$6.00
A very good variety to follow Golden Self-Blanching. It is the same dwarf, compact habit of growth, blanches easily and quickly, and is of fine quality. The leaves are green and the stalks pure white when blanched. The strain we offer is very carefully grown and is far superior to the seed usually sold.			
SALT LAKE. The Best Green Celery. See above.75	2.35	8.00
This is the best green celery we have yet found.			
FRENCH'S SUCCESS. Best Keeper75	2.35	8.00
One of the best green varieties for winter storage. The stalks are of medium length, with a compact, well developed heart, very tender and brittle. Blanches slowly to a pure white and keeps better than any other kind with which we are acquainted.			
GIANT PASCAL, Special Strain.50	1.50	5.00
This strain of Giant Pascal is largely used in New England and is considered one of the very best for late winter market. The stalks are large, very solid and blanch pure white. This strain is far superior to the ordinary Giant Pascal.			
Columbia50	1.50	5.00
Much resembles Golden Self Blanching in growth and appearance, but is a green celery and does not blanch so quickly and keeps longer. A valuable kind for early winter market.			

CELERIAC—Turnip-Rooted Celery

	Oz.	¼ lb.	lb.
LARGE SMOOTH PRAGUE.	\$.25	\$.75	\$2.50
The Standard Market Variety.			
DELICACY. Finest quality.30	.90	3.00
A new variety of Celeriac of medium size and of fine quality.			

Garten-Kresse (Ger.)

CRESS

Agretto (It.)

	Oz.	¼ lb.	lb.
Extra Fine Curled—also called Pepper Grass.	\$.12	\$.30	\$.85
WATER CRESS. Improved Broad-leaved.45	1.25	4.00
This is a much better strain than common Water Cress. Excellent for growing in green houses and frames.			

Gurken (Ger.)

CUCUMBERS

Cetriolo (It.)

$\frac{1}{4}$ lb. of seed will plant about 300 hills or sow 200 ft. of row. It requires about 2 lbs. of seed per acre.

Harris' Perfection Cucumber The Finest Long Green Variety

This we believe is the best variety for market and shipping where a long, deep green cucumber is required. We have been breeding this cucumber for a good many years and have it now so perfected that the fruit is more uniform in shape, size and color than any other kind we know of. Because of its evenness in size and handsome deep green color this cucumber often *commands a premium* over other varieties in market.

The fruit is long, straight, smooth and handsome. The color is deep green with small white rays on the blossom end. The cucumbers retain this deep green color for a long time after picking. We have kept a half-grown cucumber during warm weather in a shed for 10 days, without it showing any fading in color or losing its crispness. This is a white spined variety and never turns yellow. The fruit will average over a foot long when matured and some reach 15 inches in length.

This variety is well adapted for dill pickles as well as for general market.

We offer seed of our own growing and of very superior quality.

$\frac{1}{4}$ lb. 60c; lb. \$2.00; 10 lbs. \$19.00.

"The Perfection cucumber bought of you is extra good, better than some grown under glass. It is a fine variety for roadside stands." F. A. Whitman, Danvers, Mass. Aug. 24, 1932.

Harris' Perfection Cucumbers
Grown by Joseph Schickler, Coldwater, N. Y.
These cucumbers (grown between rows of corn) brought a premium over market prices in Rochester this year.

Longfellow Cucumber

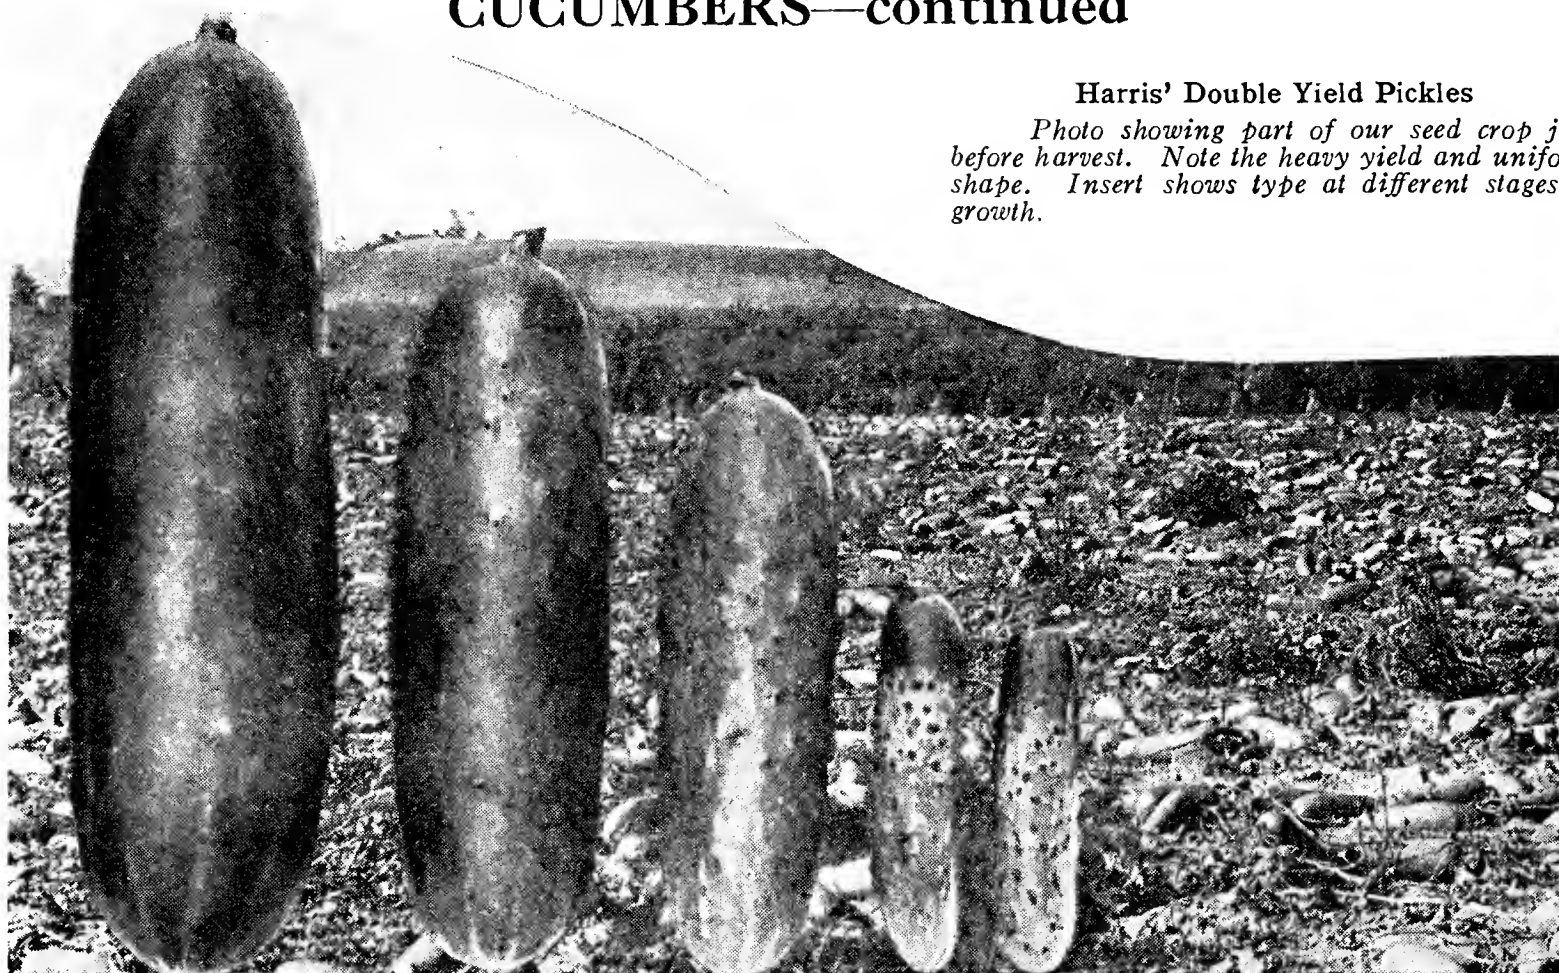

Those who want a *long, slender very dark green* cucumber will find the Longfellow a very satisfactory variety. The fruit when ready to use is 9 to 10 in. long and 2 in. in diameter. When nearly fully matured the cucumbers are often 12 to 14 in. long. The vines are vigorous and quite productive. This is a white spine variety and closely resembles hot house cucumbers and always sells for the highest prices.

$\frac{1}{4}$ lb. 60c; lb. \$2.00; 10 lbs. \$19.00.

	$\frac{1}{4}$ lb.	lb.	10 lb.
LONGFELLOW. See above.....	\$.60	\$2.00	\$19.00
A new variety of great merit.			
HARRIS' PERFECTION. The finest White Spine. See above.....	.60	2.00	19.00
We consider this the best variety for market and shipping where a long deep green heavy yielding cucumber is wanted.			
DAVIS' PERFECT.35	1.10	10.00
Long straight fruit, tapering at both ends, very dark green and holds its color well.			
EARLY FORTUNE. Selected Stock.35	1.10	10.00
A very fine strain of White Spine. It is medium early and productive, excellent for market and pickles. The fruit is 7 to 9 inches long, slightly tapering and of deep green color. It holds its color well when shipped.			
CHINA. Finest quality	1.50	5.00
Grows 15 to 20 in. long and very slender. For full description see our retail catalogue.			
IRONDEQUOIT HOTHOUSE. For forcing. See page 14.....
WOODRUFF'S HYBRID.45	1.40	13.00
One of the best of the White Spines for market. Grows 8 to 10 in. long and stays green a long time. We have a very fine strain of this cucumber.			
EARLY WHITE SPINE.30	.90	8.00
Early and very productive. Excellent for pickles as well as for slicing.			
Extra Long White Spine.35	1.10	10.00
A little later than Early White Spine, but has longer fruit.			
IMPROVED LONG GREEN.40	1.25	11.50
Very popular for both table use and for pickles. A Black Spine variety and turns deep yellow when ripe.			

CUCUMBERS continued on next page

CUCUMBERS—continued

Harris' Double Yield Pickles

Photo showing part of our seed crop just before harvest. Note the heavy yield and uniform shape. Insert shows type at different stages of growth.

Harris' Double Yield Pickle—The Earliest Cucumber

This variety yields more pickles per plant than any other variety we have ever grown. In a carefully conducted trial the Double Yield produced *three times* as many small pickles as the next most prolific variety.

When the small cucumbers are kept picked off as fast as they get to the right size for pickles, the vines produce an astonishing number. The young cucumbers are often produced in clusters of three or four like the fingers of your hand.

The cucumbers are very straight with blunt ends, medium deep green and of the very best shape for small pickles. The photo above gives a good idea of the shape.

Harris' Double Yield is not only much more prolific than other kinds but is also *earlier*. These cucumbers mature two weeks before other kinds are ready. On this account many gardeners find it profitable to grow as a market variety for slicing. The fruit is 5 to 6 inches long when ready for slicing. $\frac{1}{4}$ lb. 40c; 1 lb. \$1.25; 10 lb. \$11.50.

	$\frac{1}{4}$ lb.	1 lb.	10 lb.
✓ HARRIS' DOUBLE YIELD PICKLE. The Earliest Variety. See above....	\$.40	\$1.25	\$11.50
CHICAGO PICKLING.....	.30	1.00	9.00
Very prolific and profitable for pickles. The young fruit is straight, square ended and of medium deep green color.			
Green Prolific or Boston Pickling.....	.30	1.00	9.00
Very prolific; short, bright green fruit. A profitable variety for pickles.			
Perfect Jersey Pickle.....	.30	1.00	9.00
Longer and more slender than Chicago and Boston Pickling. An excellent variety.			
KLONDIKE.....	.30	1.00	9.00
A popular White Spine variety for pickles. Dark green, straight and very prolific.			
Early Green Cluster.....	.30	1.00	9.00
Short fruit produced early and in great abundance. Of rather light green color.			
Everbearing.....	.30	1.00	9.00
Starts bearing early and continues a long time. The cucumbers are rather short with blunt ends.			
Japanese Climbing.....	.45	1.50
A vigorous grower; long, smooth fruit of excellent quality.			
West India Gherkin.....	.45	1.50
Used for pickling.			
Lemon Cucumber.....	.55	1.75
A real cucumber about the size and shape of a lemon, used both for table and pickling.			

IRONDEQUOIT HOTHOUSE CUCUMBER

The gardeners around Rochester have developed this very fine hothouse cucumber which has proved the most profitable variety to raise under glass.

The fruit is long, slender, deep green and nearly perfectly solid, there being very few seeds and in some fruit none at all. The vines are wonderfully vigorous and very prolific.

The seed we offer was saved entirely from fruit grown under glass and will produce very fine uniform cucumbers. 100 seeds \$1.00; 500 seeds \$4.00.

Welschkorn (Ger.)

SWEET CORN

Mais (It.)

One pound of seed will plant 350 to 400 hills; 12 to 14 lbs. will plant an acre.

Note—25 lbs. of one variety will be supplied at the 100 lb. rate. A bushel weighs 40 to 50 lbs. depending on the variety.

For prices of sweet corn in quantities of less than 6 lbs. ($\frac{1}{2}$ peck) see our general catalogue.

Harris' Northern Grown Sweet Corn

For many years we have made a specialty of growing sweet corn for seed here in the North. Such seed is hardier, more vigorous and earlier than seed of the same varieties grown farther south and in the West. This is due not only to the shorter growing season but to the great care which we take in selection and breeding of our seed stocks to improve the earliness, yield and quality of our varieties.

Growers who know find it pays them to grow Harris' Northern Grown Sweet Corn.

Harris' Extra Early Bantam Sweet Corn

The Best Extra Early Yellow Corn

This variety introduced by us in 1927 has proved to be a real money maker to an increasing number of growers who have found this the best all around Extra Early yellow variety.

The ears of Harris' Extra Early Bantam are usually 7 to 8 inches long and have 8 to 10 rows of yellow kernels. They are just like Golden Bantam in appearance and quality but they mature 10 days earlier.

The yield is heavy. We know of no early corn which will produce such a large number of fine ears as Extra Early Bantam. Think of the difference in profits from using this early strain. The whole crop can be picked and sold before the market becomes flooded with the later yellow kinds.

Seed grown exclusively for us on nearby farms from our own carefully selected Stock Seed.

Price: 6 lbs. \$1.25; 12 lbs. (peck) \$2.15; 100 lbs. \$16.00. 25 lbs. or more at the 100 lb. rate.

"Your Extra Early Bantam corn is the best I have ever raised." W. E. C. Jackman, Sutton, Vt. Mar. 25, 1932.

"Your Extra Early Bantam corn has proved to be the greatest we have ever raised." J. A. Connolly, Woonsocket, R. I. April 15, 1932.

Golden Gem—The Earliest Sweet Corn

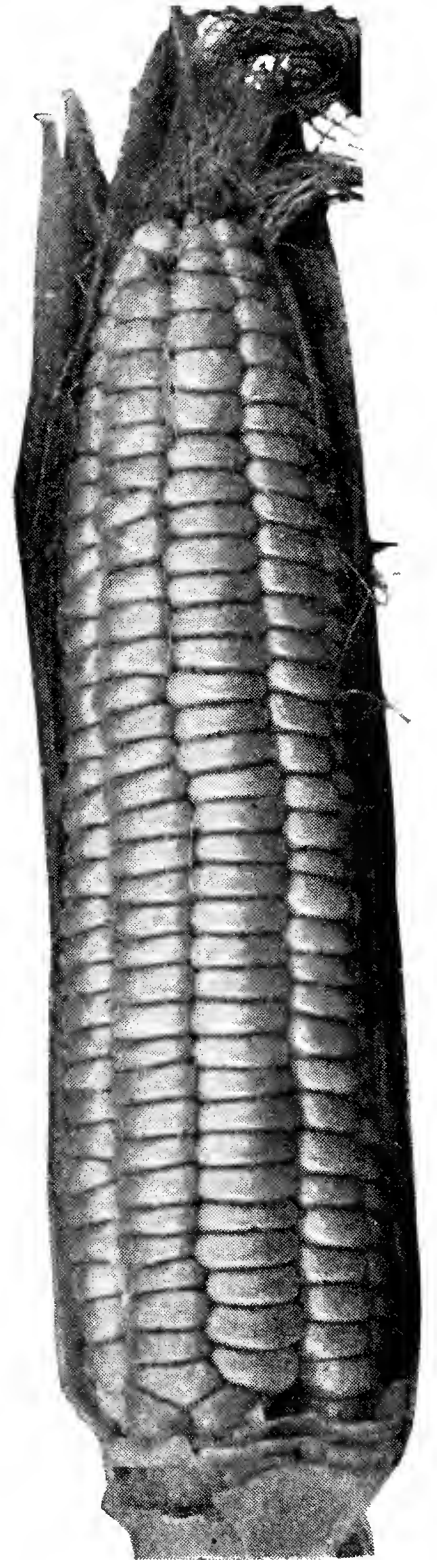

This new yellow corn was introduced a few years ago by the North Dakota Agriculture Experiment Station and has proved to be the earliest sweet corn grown.

The ears are about 5 to 6 in. long, 8 to 10 rowed, deep yellow in color and of fine quality. This is a corn which responds to good land and when well grown the stalks reach a height of about five feet.

Growers who want to be first on the market, and have rich well fertilized ground will do well to grow some of this new variety. It will pay you money to do so. Plant some of this variety in part of your corn ground to get the first early market when prices are high.

Seed of our own growing.

Price: 6 lbs. \$1.45; 12 lbs. (peck) \$2.65; 100 lbs. \$20.00. 25 lbs. or more at the 100 lb. rate.

Harris' Extra Early Bantam Sweet Corn

Golden Early Market (Gill's)

Same as Golden Hummer, Extra Early Golden, Extra Early Yellow, Etc.

To those who want an extra early yellow corn with large ears, we can confidently recommend this variety as this corn is one of the best extra early sorts.

The ears resemble closely Gill's Early Market (White) being 7 to 8 in. long and containing 10 to 12 rows of broad yellow kernels. The quality is very good.

This has proved to be a very popular kind with market growers and at roadside stands, and there are many different strains sold under a great variety of names. In order to get the true strain, we obtained our stock seed from the originator and have grown a crop here this year.

Price: 6 lbs. \$1.25; 12 lbs. (peck) \$2.15; 100 lbs. \$16.00; 25 lbs. or more at the 100 lb. rate.

Whipple's Yellow Sweet Corn

Earlier than Bantam and as large as Evergreen

This is a wonderful early *yellow* corn that has proved very profitable to raise for market. The ears are very large, 8 to 9 inches long, having 12 to 16 rows of deep kernels. They mature ready for use two or three days earlier than Golden Bantam. The quality of the corn is fine, but possibly not quite as sweet as Buttercup.

Its large size and earliness make it a most profitable market variety. The big handsome ears, as yellow as butter, always command the highest prices. The ears are of the same type as Whipple's Early and mature at about the same time.

We introduced this corn in 1920 and it has become so widely used and so profitable that it is now considered the leading yellow market variety. Try our strain of this variety. It will prove superior to all others.

To keep its earliness, size and quality we have used the greatest care in selecting the corn from which to raise seed instead of using the whole crop as is done by most growers. The only safe way is to buy seed direct from headquarters and thus get Northern Grown Seed from our own carefully selected stock. *We do not sell to dealers:*

NOTE—When ordering please write "Whipple's Yellow" not just "Whipple's" as that will confuse it with Whipple's Early which is a white corn.

Price: 6 lbs. \$1.20; 12 lbs. (peck) \$2.05; 100 lbs. \$15.00. 25 lbs. or more at the 100 lb. rate.

"This (Whipple's Yellow) sure is fine corn and I'm well pleased with it." C. D. Bower, Berwick, Penn. Apr. 23, 1932.

"I first obtained your Whipple's Yellow sweet corn the year you introduced it. I have grown it ever since and doubt if it has an equal from a market gardener's point of view." Charles A. Thayer, Milton, Mass. August 26, 1932.

Buttercup—The Sweetest Sweet Corn

The Buttercup is really an improved Golden Bantam with *larger ears*, and it always sells better than Golden Bantam. The kernels are as yellow at June butter. The ears are of good length (8 to 10 inches) and have 8 to 10 rows of large kernels of a rich butter yellow. It is medium early, maturing the same time as Golden Bantam, and is more prolific. Many stalks produce two good ears. The Buttercup contains more sugar than any variety we have tried.

For market the Buttercup is a very profitable corn to grow. There is always a good demand for yellow sweet corn of the Golden Bantam type and the large attractive ears of the Buttercup command a premium over smaller kinds.

Seed grown exclusively for us in Monroe County from our own carefully selected stock seed.

Price: \$1.20; 12 lbs. (peck) \$2.05; 100 lbs. \$15.00. 25 lbs. or more at the 100 lb. rate.

"Your Buttercup sweet corn is the best ever. Could sell ours when there was no market whatever for Bantam. Folks willingly paid 3c to 5c more per dozen for Buttercup." John M. Cooley, Westfield, N. Y. May 19, 1932.

Golden Sunshine

This is an excellent early yellow variety. The ears are 6-7 in. long and contain 10-12 rows of golden yellow kernels. This corn is very early and matures fully a week before Golden Bantam.

In order to be sure of having a true stock we have grown a crop of this corn under our care on a nearby farm.

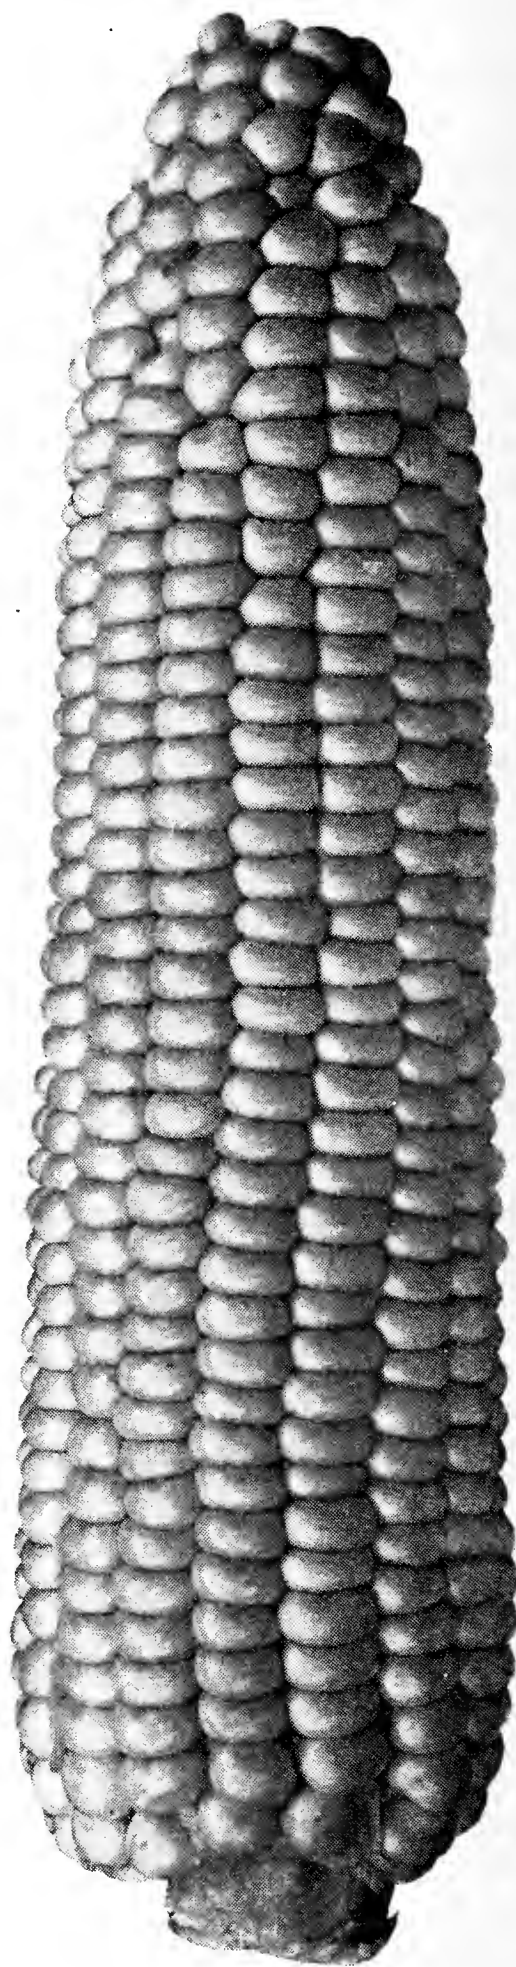

Price: 6 lbs. \$1.25; 12 lbs. (peck) \$2.15; 100 lbs. \$16.00. 25 lbs. or more at the 100 lb. rate.

Protect Your Seed Corn From Crows

If you are troubled with crows and other birds pulling up your seed corn, treat it with **STANLEY'S CROW REPELLENT**. *It is so cheap and effective, you cannot afford to plant corn without using it.* The new large size costs but 10 to 12 cents per acre. We use it on our own farm for corn, melons and cucumbers. It is easy to use, will not harm the seed or clog the planter.

Small Size (enough for 1 bu.) 60¢; **Medium Size** (enough for 2 bu.) \$1.00.

New Large Size (enough for 4 bu.) \$1.75. This is the most economical size to buy.

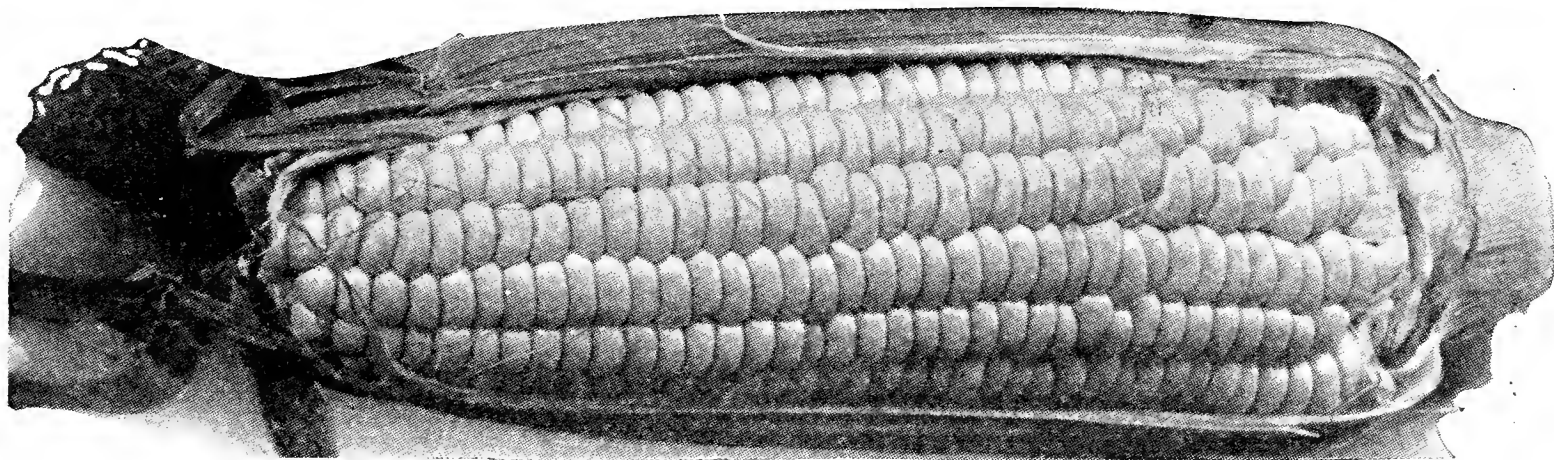

Whipple's Yellow Sweet Corn

SWEET CORN—Yellow Varieties

	6 lb.	12 lb.	100 lb.
HARRIS' NEW EXTRA EARLY BANTAM. See page 15.....	\$1.25	\$2.15	\$16.00
The best early yellow sweet corn.			
WHIPPLE'S YELLOW—The Largest Early Yellow. See page 16.....	1.20	2.05	15.00
A grand early yellow corn. One of the most profitable market varieties.			
GOLDEN BANTAM. True Strain.	1.20	2.05	15.00
Small, medium early, kernels yellow and of fine quality. Our stock is carefully bred to the true original strain and is far superior to most Golden Bantam.			
Golden Sunshine. See page 16.....	1.25	2.15	16.00
A new extra early yellow corn. Matures a week earlier than Golden Bantam. Ears 6 to 7 in. long, 12 rowed and deep yellow. Quality very good.			
BANTAM EVERGREEN.	1.20	2.05	15.00
A large, medium late yellow corn of fine quality. Ears nearly as large as Stowell's Evergreen but yellow like Golden Bantam and with something of the Bantam quality.			
GOLDEN GEM—The Earliest Variety. See page 15.....	1.45	2.65	20.00
This new corn is the earliest we have yet found.			
GOLDEN EARLY MARKET (Gill's) same as Golden Hummer and Extra Early Yellow. See page 15.....	1.25	2.15	16.00
Large bright yellow ears. Maturing a day or two after Extra Early Bantam.			
BUTTERCUP. See page 16.....	1.20	2.05	15.00
A larger, improved Golden Bantam.			
Golden Giant.	1.20	2.05	15.00
A good yellow corn to follow Bantam as it matures a week later and has larger ears, 12 rowed, and the corn is of high quality.			

Gill's Early Market Sweet Corn

Gill's Early Market—The Earliest White Sweet Corn

Without exception this is the earliest white sweet corn yet produced and is earlier than any other sweet corn we know of except *Golden Gem*. Alpha matures a few days later and has much smaller ears. Gill's Early Market is not only extremely early but in addition the ears are large, having 12 to 14 rows and often measure 8 inches long. The quality is very good for such an early variety.

This is really a remarkable corn. No very early variety hitherto has been anywhere near the size or quality of this new kind.

This is one of the most profitable varieties a gardener can raise where the market demands a white corn. By planting some of the Gill's Early Market the grower can begin selling corn before any one else and get the cream of the demand and high prices before the market is flooded with the late kinds.

Although not of our own introduction we have raised the Gill's Early Market for a number of years and have improved it both in earliness and size. The seed we offer is of our own selected stock, Northern grown here in Western New York and of the highest quality.

Price: 6 lbs. \$1.25; 12 lbs. (peck) \$2.15; 100 lbs. \$16.00. 25 lbs. or more at the 100 lb. rate.

"Gill's Early Market Sweet corn we got from you last year was the earliest and best we have ever had." Jas. Shearer & Son, St. Catharines, Ont., Canada.

Mimms' Hybrid—A Grand Main Crop Sweet Corn

This is one of the best medium late varieties where a white corn is wanted. This corn matures in midseason between early and late varieties and is the best kind of its season.

The ears are 10-12 in. long and have 12-16 rows of kernels, which fill right out to the tip. They are snow white and very tender and sweet. This corn is superior in quality to most white varieties. The yield is heavy, many stalks producing two large handsome ears.

The seed we offer is a fine pedigree strain of our own breeding which is grown for us exclusively here in Monroe County and will please the most critical gardeners.

Price 6 lbs. \$1.20; 12 lbs. (peck) \$2.05; 100 lbs. \$15.00. 25 lbs. or more at the 100 lb. rate.

SWEET CORN continued on next page

SWEET CORN—continued

Whipple's Early (White)—The Largest Early Sweet Corn

Since we first introduced this corn in 1919 it has gained steadily in popularity. Where a white corn is wanted it is one of the most profitable varieties to raise.

To describe it briefly it is like Stowell's Evergreen in size and shape, but matures *very early*—as early as Golden Bantam and two to three weeks earlier than Evergreen. The quality of the corn is much superior to Evergreen, the corn being sweet, tender and delicious. The ears are 7 to 8 inches long and very large around, as they have 14 to 18 rows of good sized kernels. Each ear is filled right out to the tip. The kernels are long and narrow like Evergreen.

A profitable market variety—Where a white corn is in demand, this is one of the most profitable kinds to raise. The ears are large and handsome, the quality so fine and the yield so heavy and above all they mature so *early* that it has proved one of the *most profitable corns ever grown*. It is like having Evergreen corn *two weeks earlier* than other people and getting nearly *twice as many dozen per acre*. The seed we offer of this variety is all Northern grown here in Monroe County from our own carefully selected stock seed. Plant only seed of known origin of this variety.

Price: 6 lbs. \$1.20; 12 lbs. \$2.05; 100 lbs. \$15.00. 25 lbs. or more at the 100 lb. rate.

White Varieties

6 lb. 12 lb. 100 lb.

GILL'S EARLY MARKET—The Earliest White. See page 17..... \$1.25 \$2.15 \$16.00

A most profitable variety for market gardeners.

WHIPPLE'S EARLY (White). See above..... 1.20 2.05 15.00

The largest of the early white varieties.

MIMMS' HYBRID. Pedigree Strain. See page 17..... 1.20 2.05 15.00

One of the best and most prolific medium late kinds. Ears have 12 to 14 rows.

HOWLING MOB..... 1.20 2.05 15.00

Large, 12 to 14 rowed ears, medium early and of good quality. A popular market corn.

Our strain is very fine, being earlier than others and the ears more uniform.

Black Mexican..... 1.25 2.15 16.00

Of very fine quality. Our stock is true.

Hickox Improved..... 1.20 2.05 15.00

Very large ears, longer than Evergreen and earlier and of better quality.

Early Mammoth..... 1.20 2.05 15.00

Earlier than late Mammoth, with immense ears. Matures with Evergreen and has much larger ears.

LONG ISLAND BEAUTY. Large late high quality..... 1.40 2.40 18.00

A late corn with immense ears, often over a foot long and 7 to 9 inches around, 16 to 20 rows of pure white kernels that are of fine quality. A profitable late market corn.

STOWELL'S EVERGREEN—Early Strain..... 1.15 1.90 14.00

The standard late corn. We have a very fine strain grown in this neighborhood that is 10 days earlier and far better than western grown seed.

Country Gentleman. Extra fine quality..... 1.20 2.05 15.00

Late; small ears, of fine quality.

POP CORN

A bushel weighs 56 lbs. 10 lbs. will plant an acre. 30 lbs. or more of one variety will be supplied at the 100 lb. rate.

7½ lb. 15 lb. 100 lb.

WHITE RICE..... \$1.20 \$2.10 \$12.00

The best and most popular variety for market.

JAPANESE HULLESS..... 1.35 2.40 14.00

Very small ears, white corn of high quality.

Black Diamond..... 1.50 2.70 16.00

Black or blue kernels of high quality.

DANDELION

Large Thick Leaf-Special Strain

The dandelion seed which we offer is the finest New England Market Gardener's strain and produces large stocky thick leaved plants, of dark green color. New seed of high germination.

Oz. 50c; ¼ lb. \$1.50; lb. \$5.00; 10 lbs. \$47.50.

Dill (Ger.)

DILL

Aneth (It.)

Long Island Mammoth

This dill is much superior to the common dill, being larger and more productive.

Oz. 10c; ¼ lb. 20c; lb. 60c; 10 lb. \$5.00.

Large
Thick
Leaf
Dandelion

*Eier pflanze (Ger.)***EGG PLANT***Melanzani (It.)**An ounce of seed will produce about 2000 plants.***BLACK BEAUTY—True Stock**.....Oz. ¼ lb. lb.
\$.45 \$1.20 \$4.00

Large, handsome, dark purple fruit, almost black. It matures early and is the most popular variety.

NEW YORK IMPROVED (Thornless).....

.45 1.20 4.00

The standard variety, having large dark purple fruit.

Extra Early Dwarf Purple.....

.45 1.20 4.00

Very early and prolific, but not as large as above kinds.

EARLY LONG PURPLE. Early and Prolific.....

.45 1.20 4.00

Fruit 10 to 12 inches long, not over 2 to 3 inches through. Early and is very prolific.

*Endivien (Ger.)***ENDIVE***Endivia (It.)**An ounce of seed will sow about 100 feet of row; 2 to 2½ lbs. per acre.*

Seed can be sown any time from early spring to August 1, in the Northern States. For late fall market sow in July. Sow in rows 20 to 24 inches apart and thin the plants to a foot apart. To blanch, tie up the leaves with soft cord or raffia. It requires about 20 days to blanch thoroughly.

GREEN CURLED PANCALIER. Best for late market.....Oz. ¼ lb. lb.
\$.15 \$.45 \$1.50The leaves of this *pink ribbed* variety are not so finely cut as the Green Curled and have fuller, heavier hearts. Grown extensively by market gardeners for a late crop. This variety does best on rich soil.**Green Curled**.....

.15 .35 1.10

Large leaves finely cut and curled. Green ribbed.

EVER WHITE CURLED.....

.15 .35 1.10

The leaves are dense, finely cut and curled and very light green, almost white, so blanch very quickly.

Moss Curled.....

.15 .40 1.25

Finely cut and curled; not so large as Green Curled.

FULL HEART BATAVIAN (Escarolle).....

.15 .40 1.25

Our strain of this variety produces heads which are tightly packed with broad dark green leaves.

“FRENCH ENDIVE”—Witloof Chicory

This is a crop that can be grown during the winter in a dark place and with very little expense. There is a good demand for “French Endive” in the markets of all the large cities.

The seed we offer is an exceptionally fine strain, being grown from *especially selected fully developed forced heads*. This seed will give a very high percentage of perfect heads when the roots are forced. *An ounce of seed will produce 3000 to 5000 roots.* Oz. 45c; ¼ lb. \$1.20; lb. \$4.00.*Fenchel (Ger.)***FENNEL***Finocchio (It.)***FLORENCE. True Italian Stock**.....

Oz. 20c; ¼ lb. 60c; lb. \$2.00

Forms a large bulb which is excellent when cooked. We offer a very fine imported stock which runs true to type, forming uniformly large bulbs.

*Knoblauch (Ger.)***GARLIC***Aglio (It.)*

The bulbs should be separated into flakes or “cloves” and set out like onion sets. Bulbs for planting: lb. 35c; 5 lbs. or more 25c per lb.

*Blatterkohl (Ger.)***KALE***Cavolo verdi (It.)**One pound of seed will sow about one acre of land.* Used principally in the late fall and winter. Sow seed in July and treat like cabbage.**DWARF CURLED GREEN or Blue Scotch**.....¼ lb. lb. 10 lb.
\$.30 \$.90 \$7.50

Very finely curled leaves of dwarf spreading habit and deep bluish-green color.

Tall Scotch Curled.....

.25 .70 6.50

Grows two feet tall with finely curled leaves. A very hardy variety.

SIBERIAN. Also called Sprouts.....

.20 .60 5.50

Dwarf spreading broad leaves curled only on the edges. Color blue gray. Very hardy.

*Knollkohl (Ger.)***KOHL RABI***Cavolo rapa (It.)**An ounce of seed will sow about 200 feet of row.***EARLY WHITE VIENNA**.....Oz. ¼ lb. lb.
\$.20 \$.55 \$1.75

The best variety for table use, very early and can be used 10 weeks after sowing.

Early Purple Vienna.....

.20 .55 1.75

Differs from White Vienna only in the color of the bulb which is light purple.

*Poree (Ger.)***LEEK***Porro (It.)**An ounce of seed will sow about 200 ft. of row.***Large American Flag**.....

Oz. 15c; ¼ lb. 45c; lb. \$1.50

The standard variety.

*Lattich (Ger.)***LETTUCE***Lattuga (It.)**An ounce of seed will sow 250 feet of row. About 2 lbs. per acre.***White Boston Lettuce**

We have a very fine strain of this excellent lettuce which heads with almost perfect uniformity, forming very compact light green heads which are blanched creamy white inside. The heads are similar to Big Boston but are lighter green and have no red tinge and they mature earlier.

One important thing about our strain of this lettuce is the uniform manner in which it heads, so that there is practically no waste in cutting a crop.

More of this lettuce is being planted each year. Muck land growers in increasingly large numbers find this variety a very profitable kind to grow for a major part of their lettuce crop.

White Boston Lettuce

Our strain of this variety is the very best that money can buy. *It is fully equal to any strain obtainable* even at twice or three times the price we charge for the seed. You cannot get better seed no matter what you pay for it. Try it and see. Oz. 20c; $\frac{1}{4}$ lb. 55c; lb. \$1.75; 10 lbs. \$16.50.

"The best crop of lettuce I ever had was from your White Boston this spring." R. H. Bagg, W. Springfield, Mass. July 4, 1932.

	Oz.	$\frac{1}{4}$ lb.	lb.	10 lbs.
WHITE BOSTON. Special Strain. See above.....	\$.20	\$.55	\$1.75	\$16.50
Our strain is very fine, there is none better.				
May King.15	.40	1.25	11.50
A very early head lettuce for open ground or forcing.				
Holyrood Hot-Weather15	.40	1.25	11.50
Large, firm heads. Stands well in the summer and is very slow to run to seed.				
BIG BOSTON. Special Strain. See page 21.....	.15	.40	1.25	11.50
Our strain has been carefully bred for many years and is the most uniform stock we have seen.				
SALAMANDER. (Dreer's All Heart or Black Seeded Tennis Ball)15	.40	1.25	11.50
Large heads, light green; stands well in hot weather. A fine summer head lettuce.				
WONDERFUL or NEW YORK.20	.60	2.00	19.00
Very large firm heads; almost as large as Wakefield cabbage. We have a very fine strain. This is the "Iceberg" lettuce grown on the West coast and shipped to our Eastern markets during the winter.				
NEW YORK No. 12—California Iceberg. See Page 21.....	.25	.70	2.25	21.00
An improved early strain of this variety especially valuable for Eastern conditions.				
Iceberg.15	.45	1.50	14.00
For open ground. Large, firm heads, curled and blistered leaves; light green.				
Prize Head.20	.55	1.75	16.50
Early, crisp, loose heads of good quality; leaves curled and tinged with reddish brown.				
Crisp as Ice.25	.75	2.50
Forms compact, medium size heads very early. The heads are tinged with deep brown. The quality is very fine.				
GRAND RAPIDS. "Special Greenhouse Strain"15	.45	1.50	14.00
Upright growth. Curled leaves. Valuable for forcing. Our strain is very fine.				
Hanson.15	.45	1.40	13.00
Large heads of fair quality.				
Black Seeded Simpson.15	.40	1.25	11.50
Loose heads of curly leaves; grows very large.				
Early Curled Simpson.15	.45	1.40	13.00
Forms bunches of much curled leaves. Light green.				
COS or ROMAINE, Trianon Self-Folding. The Best Variety15	.45	1.50	14.00
Large, long heads of fine quality and attractive appearance. Used for forcing under glass and for outside culture in spring and fall. This variety always finds a ready sale in the markets.				
Chicken.15	.40	1.25	11.50
Immense leaves. Runs up rapidly. Use for green feed for chickens.				
Mignonette.25	.75	2.50
An early small headed reddish brown tinged lettuce.				

Harris' Special Big Boston Lettuce grown on muckland.

HARRIS' SPECIAL BIG BOSTON LETTUCE

Our strain of this lettuce is exceptionally fine. The heads are uniformly solid and compact, and stand a long time without bolting. Some of the largest growers in this country both on muck and upland use Harris' Big Boston and find it equal if not superior, to any other stock obtainable. We are confident there is no better Big Boston. Oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.25; 10 lbs. \$11.50.

New York No. 12 Lettuce

“California Iceberg”—Can Now be Raised in the East!

We are now able to offer a new strain of New York or Wonderful lettuce which matures earlier than the old strain and is better adapted to growing conditions in the eastern states. The strain is called New York No. 12. If given proper culture the strain will produce large, firm heads almost perfectly round which mature 10 days earlier than the old strain, and head much better under eastern conditions.

There are several ways of getting good results from this type of lettuce. The seed can be sown under glass and the plants set out early in the open ground. Another way is to sow the seed in July so the lettuce will head in the fall when the weather is cool. Overhead irrigation is of great benefit. This variety should be grown on upland as no lettuce of this type does well on muck.

New York No. 12 Lettuce. Oz. 25c; $\frac{1}{4}$ lb. 70c; lb. \$2.25; 10 lbs. \$21.00.

Wasser-Melone (Ger.)

WATERMELON

Cocomero d'acqua (It.)

An ounce of seed will plant about 25 hills; 2 to 3 pounds to the acre.

Wonder Melon—(New)

This is the largest of the oblong varieties which can be successfully grown in the North. The melons are dark green in color with bright red flesh of very high quality. Large crops are produced even in this latitude where it is hard to raise watermelons.

Because of this combination of earliness, high quality and good yield this melon should be a profitable kind to grow in the North for the local market and roadside stand.

$\frac{1}{4}$ lb. 30c; lb. \$1.00; 10 lbs. \$9.00.

	$\frac{1}{4}$ lb.	lb.	10 lb.
STONE MOUNTAIN. Try This One For Market.....	\$.45	\$1.25	\$11.50
Large, dark green, rounded fruit with bright red flesh of finest quality. Ripens early. Is one of the best varieties for the North. Largest of the early varieties and of high quality.			
WONDER MELON—New—See above30	1.00	9.00
The earliest long dark green variety.			
FORDHOOK EARLY.....	.25	.75	7.00
A very desirable variety for cool climates. Early, fairly large and with bright red flesh of very good quality.			
COLE'S EARLY.....	.25	.75	7.00
A very early good sized melon. The fruit is striped light and dark green. Valued principally on account of its earliness.			
Halbert Honey.....	.25	.75	7.00
Long, dark green, flesh red and of finest quality. Medium early.			
KLECKLEY'S SWEETS.....	.25	.70	6.50
Long, deep green, attaining a large size and of fine quality. One of the best kinds. Our Northern grown seed is superior to Southern grown. Seed saved from best melons only.			
Ice Cream or Peerless.....	.25	.75	7.00
One of the best early varieties. Large light green, early and of fine quality.			
HUNGARIAN HONEY. The Sweetest Watermelon.....	.30	1.00
Small, round, dark green, bright red flesh deliciously sweet. Very early. Black Seeded.			
GREEN CITRON, or Colorado Preserving..... Oz. 10c	.25	.75	7.00
(Green Seeds). Used for preserves. Very prolific.			

*Melone (Ger.)***MUSKMELON or Cantaloupe***Popone (It.)**An ounce of seed will plant about 100 hills; 2½ to 3 lbs. per acre.***Bender's Surprise****Muskmelon****Harris' Special Strain****A Grand Melon for Both Shipping and the Home Market**

For a number of years this melon has been a consistent money maker for progressive growers. There is no muskmelon quite equal to the Bender for attractive appearance, fine flavor, size and keeping qualities combined.

The melons are round to oval in shape, ribbed and covered with coarse netting. The flesh is very thick, especially so at the blossom end so that the melons rarely crack.

When ripe the melons turn a golden tint which shows through the netting and gives the fruit a very attractive appearance.

The size of the melons averages quite large, many weighing 10 lbs. and more. We have had melons that weighed over 16 pounds.

A valuable point about these melons is that they will keep in good condition five or six days after picking, and actually improve in flavor during that time. The flesh is so firm and thick that the melons remain firm and in good condition much longer than other large melons of this class. For market and shipping this is an important consideration.

We have bred the Harris' Strain of Bender melon on our own farms for over ten years, paying special attention to high quality and trueness to type, so that the Harris' Strain is much superior to ordinary strains of this variety.

Seed of our own growing: Oz. 30c; ¼ lb. 85c; 1b. \$2.75; 10 lbs. \$25.00.

"We can report unusually fine success with your stock of Bender's Surprise melon seed. The plants were started as usual in pots under glass and were set in the field in the center of strips of 36" mulch paper running the length of each row. Almost all of the crop ripened before Labor Day, an important factor with us. The quality was the finest we have ever had." L. L. Allen, Camp Isida, Burlingham, N. Y. Mar. 9, 1932.

"I am especially interested in growing melons. Your Bender's Surprise muskmelon is also the best of that variety I have grown." W. E. Newlin, Carthage, Ind. Oct. 7, 1932.

Bender's Surprise Melons
These large melons will sell quickly at the roadside stand.

Sugar Rock Muskmelon—Also Known as "Honey Rock"

Sugar Rock Muskmelons

This new variety has become increasingly popular in many markets, especially where a firm high quality melon of medium size is required.

The melons are of very light green, almost perfectly round and are covered uniformly with coarse netting.

The flesh is of **deep orange** color and quite firm. These melons are remarkably uniform in their delicious sweetness and very high flavor.

The fruit has a hard shell and will stand shipping well. They are very uniform in size, being 4 to 5 in. in diameter and 5 to 6 in. long. We offer a fine true strain.

On account of its exceptionally high quality and handsome appearance this melon has proved a very profitable variety, and should be more widely grown.

We are pleased to be able to offer our customers a very fine Northern Grown strain of Sugar Rock seed which has been saved from only the best melons.

Oz. 25c; ¼ lb. 75c; 1b. \$2.50; 10 lbs. \$22.50.

Delicious

The Sweetest Early Muskmelon

This is the *earliest* large melon of high quality we have ever raised. In our trials the Delicious has shown itself to be nearly as early as Golden Champlain and much earlier than Emerald Gem. While the melons were much larger and superior in quality to either of these varieties.

The melons are of oval shape, light green with close, fine netting. The flesh is of deep orange color, very sweet and of high flavor.

We highly recommend this melon for the home garden and home market. This melon is not recommended for long distance shipping but its sprightly flavor and delicious sweetness will always be appreciated in the nearby markets.

The seed we offer is a very fine true stock and will produce melons of uniform size and the finest quality.

Oz. 35c; $\frac{1}{4}$ lb. \$1.10; lb. \$3.50; 10 lbs. \$30.00.

Delicious Muskmelon

	Oz.	$\frac{1}{4}$ lb.	lb.	10 lb.
BENDER'S SURPRISE. "Harris' Special Strain." See page 22	\$.30	\$.85	\$2.75	\$25.00
A grand melon. Unequalled in fine flavor, size and keeping qualities.				
DELICIOUS—The Earliest Large Melon. See above35	1.10	3.50	30.00
Very early. Of great value on account of its earliness and high quality.				
GOLDEN CHAMPLAIN also called Lake Champlain.25	.75	2.50	22.50
The earliest melon and valuable on that account. The melons are medium size, nearly round, fairly well netted and light green color turning to golden when ripe. The flesh is orange and of fairly good quality.				
SUGAR ROCK also called " Honey Rock. " See page 2225	.75	2.50	22.50
A new melon of great merit.				
HALE'S BEST. Best for distant markets.15	.45	1.50	14.00
The earliest of the Rocky Ford type. Medium size, oval fruit. Very heavily netted. Flesh thick, deep orange and of finest quality. The melons are remarkably uniform in size, shape and quality.				
Irondequoit or Tip Top.15	.45	1.50	13.50
Large, round, netted; yellow flesh. A melon of very high quality but not such a good keeper as the Bender. Largely grown in Ohio.				
Hearts of Gold.15	.40	1.25	11.50
A fine melon for shipping in baskets—medium in size, round and well netted. Flesh orange yellow, of high flavor, very firm and holds up well a long time.				
MILLER'S CREAM or Osage.15	.40	1.25	11.50
Oval, dark green, slightly netted, yellow flesh of the highest quality. A very fine early melon and a profitable one for market.				
Emerald Gem.15	.35	1.10	10.00
Small, round, green, slightly netted, with yellow flesh of finest flavor; very early and prolific.				
Extra Early Knight. Green Flesh.15	.40	1.25	11.50
A very early melon popular in markets where known. The fruit is of medium size, oval in shape and well netted. Flesh is green and is sweet and of good flavor.				

MUSHROOMS

Mushrooms can be raised in cellars or under greenhouse benches where the temperature can be kept between 50 and 60°. The spawn we offer is a fine pure culture strain, and absolutely fresh. A brick of mushroom spawn will plant 10 to 12 sq. ft. of bed.

Price: One brick 40c; 3 bricks \$1.10; 10 bricks \$3.00. Postpaid. Not postpaid: 10 bricks or more at 20c per brick.

Write for prices on large quantities. Directions for growing will be sent with each order of spawn if requested.

MUSTARD

An ounce of seed will sow about 300 feet of row.

	Oz.	$\frac{1}{4}$ lb.	lb.
FORDHOOK FANCY. Finest for Salads.	\$.10	\$.25	\$.65
Finely cut and curled leaves, very ornamental.			
Giant Southern Curled.10	.20	.60
Very large curled leaves.			

OKRA or GUMBO

An ounce of seed will sow about 50 feet of row.

	Oz.	$\frac{1}{4}$ lb.	lb.
PERKINS' LONG-POD. Standard Market Variety	\$.10	\$.20	\$.60
Long green pods straight, somewhat corrugated and of the best quality.			
White Velvet.10	.20	.60
Smooth light green pods of medium length.			

Zweibel (Ger.)

ONIONS

Cipolle (It.)

An ounce of seed will sow 125 feet of row. It requires about 6 lbs. of seed per acre.

Riverside Sweet Spanish Onion

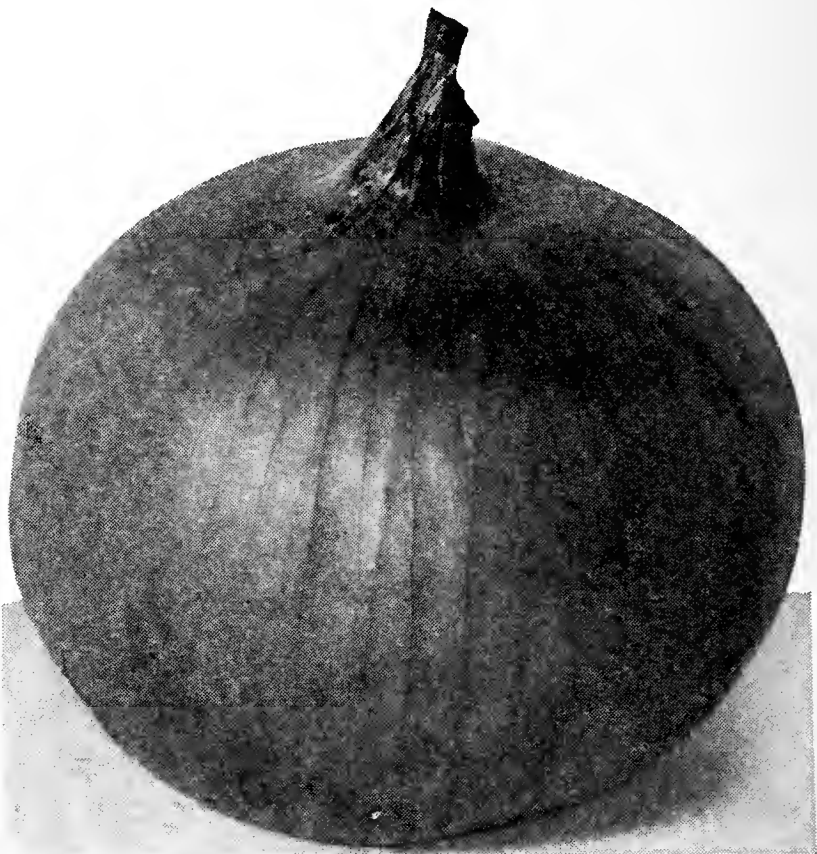

This is the largest onion we have ever raised. From our experience we know that these immense yellow Spanish onions can be grown profitably in this country. During the past three years they have done better and have been more resistant to disease and insect pests than any variety in our trials.

The onions are of almost perfect globe shape, slightly flattened at the ends, and clear bright yellow. The flesh is very mild and pleasant in flavor. The keeping qualities are remarkable for such a large onion.

In our own grounds these onions matured as early as Prizetaker and only a little later than Southport Yellow Globe while the onions are *twice the size* being often four inches through and weighing a pound or more. These were raised from seed sown in the open ground and the plants thinned to stand 2 or 3 in. apart.

Sow early on good rich soil, top dress with a very little nitrate of soda and you will have a wonderful crop of big handsome onions that should sell at high prices.

Oz. 30c; ¼ lb. 85c; lb. \$2.75; 10 lbs. \$26.00.

Riverside Sweet Spanish Onion

"Want to say we tried your Riverside Sweet Spanish Onion last year and although we planted late we had a very good crop and the onions matured, which is exceptional for our short season. We are still using these onions and they have not sprouted as yet but are still firm so they have kept very well." R. V. Boetcher, Great Falls, Mont. Mar. 24, 1932.

Yellow Globe Danvers—Harris' Selected Strain

This is the most popular commercial onion grown. Our seed is grown with great care and will produce onions of uniformly fine globe shape, deep orange color and with a firm tight skin which insures its good keeping qualities.

This onion has a reputation for producing large yields of No. 1 bulbs both on upland soil and muck. The bulbs mature medium early and year in and year out is the most dependable variety which can be grown.

Oz. 15c; ¼ lb. 45c; lb. \$1.50; 10 lbs. \$14.00.

Japanese Bunching

This new variety is a decided improvement over the old bunching kinds. This onion does not form a bulb but grows in clusters of three to five mild straight onions. It is a rapid grower and forms marketable green onions very early. When fully grown the onions are nearly an inch in diameter, but retain their mild flavor.

Market growers will find this an excellent kind both for early spring and fall bunching.

Oz. 25c; ¼ lb. 75c; lb. \$2.50; 10 lb. \$24.00.

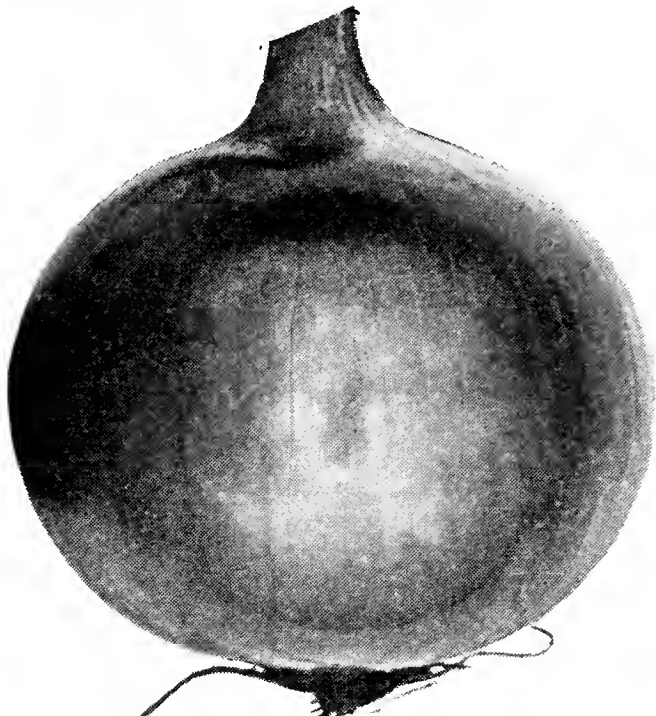

Yellow Varieties

	Oz.	¼ lb.	lb.	10 lb.
OHIO YELLOW GLOBE	\$.15	\$.45	\$1.50	\$14.00
A very fine strain of Yellow Globe Danvers onion which has given large yields of very fine onions. They are large globe shape slightly flattened on the bottom, and deep yellow in color.				
MOUNTAIN DANVERS . See page 25.....	.15	.50	1.60	15.00
A new <i>early</i> globe onion.				
YELLOW GLOBE DANVERS . See above.....	.15	.45	1.50	14.00
The standard yellow market variety. Our seed is grown with great care and the onions are of uniform globe shape and deep yellow color.				
SOUTHPORT YELLOW GLOBE15	.45	1.50	14.00
Of perfect globe shape, large size. A week later than Yellow Globe Danvers.				
EBENEZER or "Japanese"20	.60	2.00	17.50
A very fine yellow onion that will keep all winter and is of mild, pleasant flavor. The onions are flattened and of a light yellow color.				
RIVERSIDE SWEET SPANISH . See above.....	.30	.85	2.75	26.00
Very large handsome yellow onion.				
Prizetaker20	.55	1.75	16.50
Large yellow onion of very handsome globe shape and mild flavor. Does not keep as well as Danvers. Fine for fall market.				

Mountain Danvers Onion

A very early maturing strain of Yellow Globe onion originating in the mountains of Colorado. The onions are of fine globe shape, deep yellow color and very firm. They ripen two or three weeks earlier than Yellow Globe Danvers, and are valuable on this account where the seasons are short. These onions have remarkable keeping qualities and can be safely stored all winter. They do not get quite as large as the Yellow Globe Danvers, but are of good size and are often found more profitably than the later kinds because they can be marketed before other kinds are ready. *Muck growers have found it profitable to plant a portion of their onion acreage in Mountain Danvers.*

Price: Oz. 15c; ¼ lb. 50c; lb. \$1.60; 10 lbs. \$15.00.

Mountain Danvers Onion

White Varieties

	Oz.	¼ lb.	lb.	10 lb.
JAPANESE BUNCHING (See page 24).....	\$.25	\$.75	\$2.50	\$24.00
An improved early spring bunching onion. Large and mild.				
Mammoth Silver King20	.60	2.00	19.00
Very large white, flat onion used principally for bunching while green. Seed sown in the spring will make large bunching onions in July and August.				
WHITE PORTUGAL or SILVER SKIN—For Bunching25	.70	2.25	20.00
Flat, white onion of mild flavor and early. Excellent for pickling and early green onions.				
EXTRA EARLY BARLETTA25	.70	2.25	20.00
The best small white onion for pickling. Our seed is the real Barletta onion, producing very small round, white onions that mature very early. Sow at the rate of 50 lbs. per acre.				
SOUTHPORT WHITE GLOBE25	.75	2.40	22.50
The largest and finest white onion. A very profitable variety for experienced growers as it always commands the highest prices.				
White Welsh25	.70	2.25	21.00
Does not form a bulb, but can be sown in the summer for early spring bunching onions. Perfectly hardy.				

Red Varieties

SOUTHPORT RED GLOBE, Harris' Special Selected20	.60	1.85	17.00
Large, perfectly round, deep red onion; keeps well and is the best red variety.				
Large Red Wethersfield20	.55	1.70	16.00
Very large, deep red, flat.				

ONION SETS

One peck of sets will plant 600 to 700 feet of row.

	Pk. (8 lbs.)	Bu. (32 lbs.)
White Sets—Silverskin. Best for bunching	\$1.10	\$3.25
Fine small sets.		
EBENEZER or "JAPANESE"—The Best Yellow Sets	1.00	3.00
These sets are the best to produce large dry onions for early use. Nice uniform sets of the true stock.		

NOTE—Please write for price if a considerable quantity is required.

Petersilie (Ger.)	PARSLEY	Prezzemolo (It.)
An ounce of seed will sow about 200 ft. of row.		

Dwarf Perfection

We believe this is the best strain of parsley obtainable. The leaves are beautifully cut and curled. There are practically no plain leaved plants and all are of a uniform deep green color. Gardeners will find this the best strain both for outside and greenhouse growing.
Oz. 15c; ¼ lb. 40c; lb. \$1.25.

	Oz.	¼ lb.	lb.
DWARF PERFECTION. See above.....	\$.15	\$.40	\$1.25
The finest parsley we have ever seen. Deep green and very finely curled.			
Champion, or Triple Moss Curled10	.25	.75
Finely curled deep green leaves.			
Plain. Uncurled leaves, used for flavoring10	.25	.75
HAMBURG, Long or Parsnip Rooted12	.30	.90
The roots are 8 in. long parsnip-shaped, smooth and white.			

Erbesn (Ger.)

PEAS

Piselli (It.)

One pound of peas will sow 100 feet of row. Two to four bushels per acre.

Note—We sell peas by weight only. A pound is about 1 pint, 15 lbs. equal a peck and 56 lbs. a bushel. 30 lbs. or more of one variety will be supplied at the 100 lb. rate. For prices of peas in amounts of less than 7½ lbs. (½ peck) please refer to our general catalogue.

Peas in lots of 100 lbs. or more are sent by prepaid freight.

Mammoth Podded Extra Early Peas

This new large podded pea has proved a very profitable market variety. It is very early being ready only a day or two after Alaska and First and Best. The pods are larger (see illustration to the right) than these varieties, and the yield is therefore much greater. The pods are deep green in color, 4 inches long and borne in great profusion on strong vines. This pea is hardy and can be sown as soon as the frost is out of the ground. Growers have found this the most profitable extra early kind to grow.

7½ lbs. \$1.75; 15 lbs. \$3.00; 56 lbs. (bu.) \$10.08; 100 lbs. \$18.00.

Laxton's Progress Peas

This pea is the largest and best of the medium early dwarf varieties. It resembles Hundredfold but the pods are larger and it matures a little earlier.

The vines grow 15 to 18 in. high and are covered with an abundance of large deep green pods 4 to 4½ in. in length. The peas ripen so uniformly that ordinarily two pickings will clean up the crop. The yield is large and the big handsome well filled pods find a ready sale making this variety one of the best kinds to follow the extra early sorts.

Price: 7½ lbs. \$1.80; 15 lbs. \$3.15; 56 lbs. (bu.) \$10.64; 100 lbs. \$19.00.

"Have raised peas for 23 years and have never had anything like your Mammoth Podded Extra Early. They beat them all. Started picking June 11th. Delbert Bungart, Birmingham, Mich.

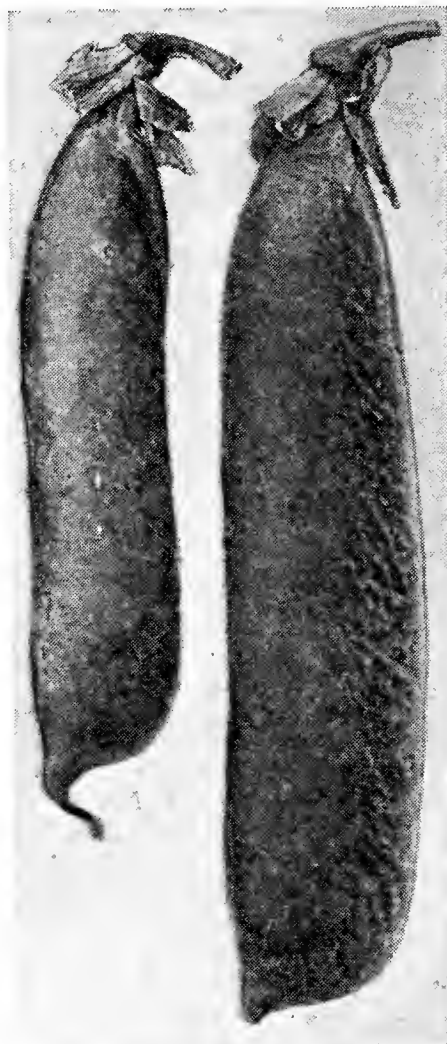

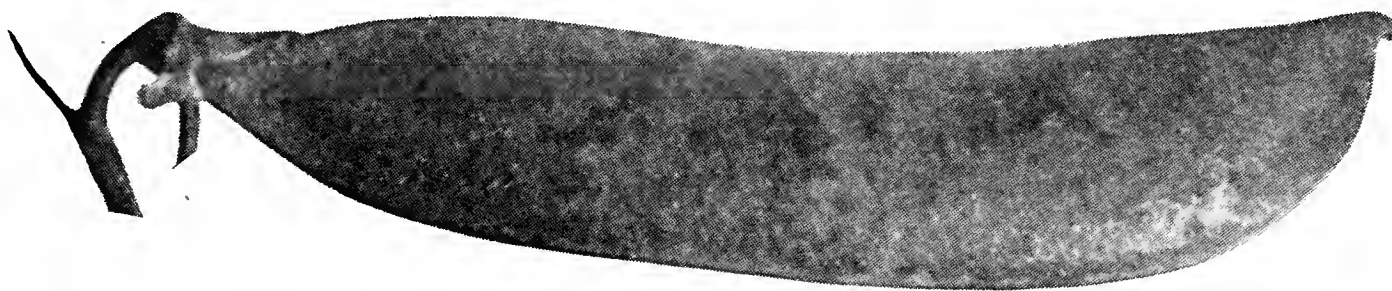

Photo showing relative size of Mammoth Podded Extra Early (right) and First and Best (left)

	(Bu.)			
	7½ lb.	15 lb.	56 lb.	100 lb.
Alaska.	\$1.40	\$2.50	\$ 8.10	\$14.50
Very early, small pods. 2 ft.				
Surprise or Eclipse.	1.65	2.85	9.52	17.00
Very early and of fine quality. Small pods. Very prolific. 2 ft.				
First and Best, or Pedigree Extra Early.	1.45	2.55	8.40	15.00
Extra Early; pods three inches long, well filled. This is the earliest variety. 2 ft.				
MAMMOTH PODDED EXTRA EARLY. See above.	1.75	3.00	10.08	18.00
Much larger pods than other extra early kinds. 3 ft.				
LAXTON'S PROGRESS. See above.	1.80	3.15	10.64	19.00
We consider this the largest and best of the early dwarf varieties. It resembles Hundredfold, but is a little earlier and larger. 18 in.				
THOMAS LAXTON.	1.65	2.85	9.52	17.00
Very early; medium-sized pods. One of the most profitable market peas. Our stock is very fine, 3 ft.				
SUTTON'S IDEAL—Improved Thomas Laxton	1.65	2.85	9.52	17.00
A new early pea. Very similar to Thomas Laxton but a day earlier and the pods are a little larger. Bears heavy crops and is a profitable market variety. 3 ft.				
GRADUS, or Prosperity.	1.75	3.00	10.08	18.00
Large pods, early and of highest quality. Standard market garden variety. 3 ft.				
WORLD'S RECORD.	1.80	3.10	10.36	18.50
A little earlier and larger with shorter vines than Gradus. It is of the finest quality and a profitable variety for market. 2½ ft.				
LITTLE MARVEL.	1.85	3.30	11.20	20.00
Very prolific, matures a day or two later than Nott's Excelsior and has pods a little larger; vines stocky. 15 in.				
Nott's Excelsior.	1.65	2.85	9.52	17.00
Early dwarf vines, medium-sized pods; one of the best early dwarf peas. 15 in.				
HUNDREDFOLD or Blue Bantam (Improved Laxtonian)	1.80	3.15	10.64	19.00
Much like Laxtonian, but larger and better. Vines very strong and sturdy, 16 to 18 in. high. Pods 4 in. long and deep green. A very fine early dwarf pea.				

Midseason Giant

Midseason Giant—New Large Podded Main Crop Peas

We highly recommend this new variety for market gardeners and the roadside stand. The pods are large (4½ in. long) dark green and sturdy. They will stand up exceptionally well under considerable handling. The yield is high, the pods being borne in great numbers on strong vigorous vines 18-24 in. high.

Midseason Giant comes on between the early sorts and the late tall varieties and it has shown a remarkable ability to stand up and bear well in hot dry weather. Try some this year, you will like them.

7½ lbs. \$1.85; 15 lbs. \$3.30; 56 lbs. (bu.) \$11.20; 100 lbs. \$20.00.

Medium and Late Varieties		(Bu.)

PEANUTS

EARLY SPANISH..... lb. 30c; 5 lb. \$1.25; 10 lb. \$2.00
The earliest variety. Best for the north.

Pastinake (Ger.)

PARSNIPS

Pastinaba (It.)

An ounce of seed will sow 150 ft. of row. Sow 2½ to 3 lbs. per acre.

Harris' Model Parsnip

We have been improving the old Hollow Crown parsnip by careful selection for many years until we have obtained a very fine strain which we call "Harris' Model."

The parsnips grow to a good length, but not too long. The roots are smooth, snow white, and have practically no side roots or prongs. Their whiteness is quite remarkable and gives the roots a very attractive appearance, which make them sell for highest prices.

Our seed is of our own growing from transplanted and very carefully selected roots and it will be found far superior to the seed usually sold.

Oz. 15c; ¼ lb. 40c; lb. \$1.10; 10 lbs. \$10.00.

Long Hollow Crown Long smooth roots, not as uniform or white as Harris' Model.

Oz. 10c; ¼ lb. 20c; lb. 60c; 10 lbs. \$5.00.

Transplanting Model Parsnip's for seed at Moreton Farm

*Pfeffer (Ger.)***PEPPERS***Peperoni (It.)**An ounce of seed will produce about 1000 plants.***Harris' Improved SQUASH Pepper****Very Early and Heavy Yielder**

Harris Improved Squash Pepper

We introduced this new pepper last year and it has proved itself a very valuable variety. The fruit is very early of good size and with fine thick flesh. This new pepper is so prolific that it produces three times as many peppers as any other "Squash or Cheese" pepper which we have seen. It has been almost impossible to get a squash pepper to bear enough early large fruit here in the North to make it pay to grow them in spite of the ready sale which peppers of their type find, but with Harris' Improved Squash you can get large crops of fine ripe fruit before the frost.

Market Gardeners should not fail to make a planting of Harris' Improved Squash this year.

$\frac{1}{4}$ oz. 25c; oz. 80c; $\frac{1}{4}$ lb. \$2.60; lb. \$9.00.

Pepper Plants

Harris Pepper Plants are sturdy, well hardened and true to name. See page 39 for varieties and prices.

Harris' Early Giant Pepper**The Earliest and Most Prolific Large Pepper**

By careful breeding methods extending over a number of years we have developed this very large pepper that is not only early but yields a large number of peppers on every plant. Hitherto all large peppers have been late and did not yield well in the North.

Harris' Early Giant has fruit that stands $4\frac{1}{2}$ in. high and 4 in. across. 21 peppers fill a 14 qt. basket and 45 completely fill a bushel crate. It is larger than Ruby King and Giant Crimson and fully as large as Chinese Giant and three or four weeks earlier and much more prolific.

On a great many plants there are 10 to 12 large peppers and 8 or 10 smaller ones at one time, the yield is therefore, immense.

The plants grow 18 in. to 2 ft. tall and produce such a large number of peppers that there is hardly room for them on the plant. The peppers are deep green turning to a brilliant red. The flesh is thick and of a very sweet pleasant flavor. Harris' Early Giant is only a week later than Harris' Earliest, the earliest pepper grown.

Get seed from the originator. One reason why this pepper is so early and prolific is because the seed is raised in the North where the seasons are short. To be sure you are getting northern grown seed get it from headquarters.

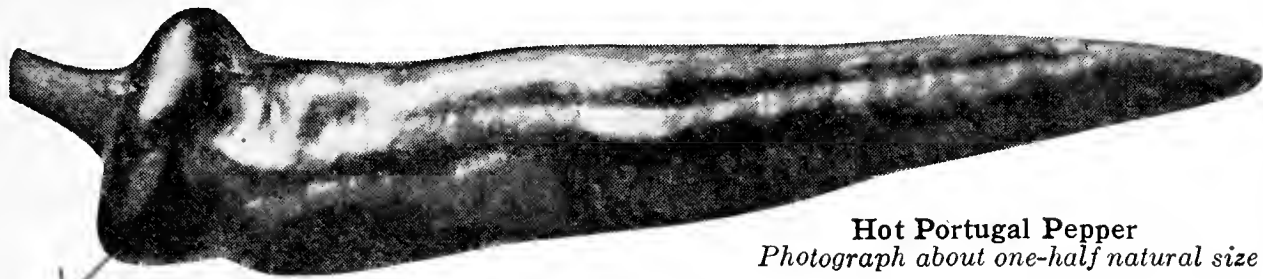

You can get seed of the original strain from us for no more than you have to pay for ordinary seed grown farther south.

Seed of our own growing: oz. 60c; $\frac{1}{4}$ lb. \$1.75; lb. \$6.00.

"Your Harris' Early Giant pepper is the finest and heaviest yielding pepper that we have ever grown. Most all of the plants averaged twenty-five to thirty large peppers." Rand & Christensen, Wilson, Conn. Oct. 30, 1931.

Harris' Early Giant Pepper

Hot Portugal Pepper
Photograph about one-half natural size

Hot Portugal—New (Large) Hot Pepper

This year we are pleased to be able to offer you a very hot pepper which is both prolific and large. The fruit as shown in the illustration in this page is long, pointed and quite smooth for a pepper of this type. The fruit averages six inches or over in length and they are abundantly borne on the sturdy plant. This pepper in addition to its large size, is just as hot as the old Giant Cayenne. ¼ oz. 30c; oz. 90c; ¼ lb. \$3.00.

	Oz.	¼ lb.	lb.
HARRIS' EARLY GIANT. The Largest Early Pepper. See page 28.....	\$.60	\$1.75	\$6.00
This is the earliest large pepper which we know. Northern Grown Seed.			
HARRIS' EARLIEST. The Earliest and Most Prolific Sweet Pepper.....	.60	1.75	6.00
This is the earliest sweet pepper we know of. The peppers are medium size, somewhat resemble Bull Nose but are very mild and sweet. The plants are dwarf and compact and covered with fruit, there often being a dozen ripe peppers on a plant at one time besides many green ones. Seed of our own growing.			
HARRIS' IMPROVED SQUASH. See page 28..... ¼ oz. 25c	.80	2.60	9.00
This improved strain of Squash Pepper is earlier, more prolific and the peppers have thicker meat than the old type.			
Giant Crimson or Ohio Crimson.....	.50	1.35	4.50
Large, prolific and medium early.			
MAGNUM DULCE.....	.60	1.75	6.00
The largest pepper of which we have any knowledge. Medium late.			
CALIFORNIA WONDER. Large, thick flesh.....	.60	1.75	6.00
A fine sweet pepper with very thick flesh. Fruit large, smooth and very heavy. Medium early and yields well. A valuable variety.			
Ruby King.....	.30	1.00	3.25
Large, sweet, deep green. Turns to bright red when ripe. 4 to 5½ in. long, 3 in. wide.			
NEAPOLITAN.....	.35	1.10	3.50
Very early, medium size and mild. Fruit 3½ to 4 in. high and 2 in. through. Rather light green when young, bright red when ripe. The fruit stands upright on the plant.			
WORLDBEATER.....	.35	1.10	3.50
One of the best large red peppers. The fruit resembles Ruby King but is larger; the flesh is mild and quite thick. A high yielder when well grown.			
OSHKOSH. Large Yellow.....	.65	2.10	7.00
The largest and best yellow pepper we know of.			
Golden Dawn.....	.50	1.50	5.00
A fine yellow pepper. Large and sweet.			
Pimiento.....	.30	.90	3.00
Very thick, heavy fruit of medium size, pointed at the bottom. Very deep green when young, bright red when ripe, mild flavor. Matures rather late, but plants are quite prolific.			
SQUASH (also called Burpee's Sunnybrook, Tomato and Cheese).....	.45	1.20	4.00
Small round peppers the shape of a tomato. They are mild and excellent for salads.			
Large Bell or Bull Nose.....	.35	1.10	3.50
Early, medium size, quite prolific, somewhat pungent or "hot."			
GIANT CAYENNE.....	.60	1.75	6.00
Much larger than the old Cayenne and equally pungent. Fruit 3 to 4 in. long and 1½ in. through at top, coming to a point at the bottom. Very early and prolific.			
HEIFER HORN (Hot).....	.50	1.50	5.00
A hot pepper, longer than Giant Cayenne, a little later and not quite so hot. One of the largest and best of the "hot" peppers.			
HUNGARIAN WAX (Hot).....	.60	1.75	6.00
The peppers are of a waxy yellow when young, turning red when ripe. Quite "hot".			
HOT PORTUGAL. (New) See above..... ¼ oz. 30c	.90	3.00

The common yellow field pumpkin.					

*Radies (Ger.)***RADISH***Ravanelli (It.)**¼ lb. of seed will sow about 300 ft. of row.***Early Scarlet Globe Radish****Special Strain****Best for Forcing or Open Ground**

We can confidently state that our strain of this popular radish is as good if not better for both outdoor and greenhouse growing than any strain in the market today. Our seed is all grown from transplanted roots. This strain is the true olive shape, and of an attractive bright red color. It is early and very uniform in maturity and has medium small tops.

The seed is very vigorous and of high vitality which is of utmost importance to the greenhouse grower.

¼ lb. 20c; 1b. 60c; 10 lbs. \$5.50; 100 lbs. \$50.00.

Early Scarlet Globe—Special Strain

NOTE: To growers who are interested we will be glad to furnish germination figures before they buy their seed.

"The Early Scarlet Globe radish is the finest radish we have ever grown." Alton H. Dillenbeck, Fonda, N. Y. July 29, 1932.

Red or Scarlet Varieties

	¼ lb.	1b.	10 lb.
HARRIS' SPECIAL SCARLET FORCING. Proved Strain.	\$.25	\$.80	\$ 7.00
Round, deep red, small leaves and extremely early. A very superior variety for spring forcing and the open ground. Our strain of this seed is without superior in color, vigor and type.			
EARLY SCARLET GLOBE, Special Strain. See above..... (100 lbs. \$50.00)	.20	.60	5.50
The most popular variety for forcing and outdoor culture.			
Early Scarlet Globe. (100 lbs. \$40.00)	.20	.50	4.50
As usually sold. Tops not as small as our Special Strain, and for this reason it is better for open ground than for greenhouse use.			
CRIMSON GIANT GLOBE.25	.80	7.00
Very large forcing radish. Not so early as Early Scarlet Globe, but larger and stands longer without becoming pithy.			
EARLIEST SCARLET WHITE-TIPPED. Forcing Strain.25	.80	7.00
The radishes are round and are white on the bottom and part way up the sides. This is the finest strain of white-tipped radish, having small tops and is very fine for forcing.			
French Breakfast.25	.80	7.00
Oval, bright red with white tips; early.			
Long Scarlet Short Top also known as Cincinnati Market.25	.70	6.50
Excellent long radish for open ground.			
Chartier.25	.70	6.50
Grows 4 to 5 inches long, bright red with white tips.			

Radish—White Varieties

ICICLE or Pearl Forcing. Short-topped strain.20	.55	5.00
Long, slim, white radish of very rapid growth. The best long white radish for forcing and in open ground. Our strain has unusually small tops.			
Delicacy.25	.80	7.50
A very fine white radish for summer or late fall use. Of globe shape, pure white and of fine quality. One of the best white summer varieties.			
White Strasburg.25	.70	6.50
Large, long, white summer radish.			
Giant White Stuttgart.25	.70	6.50
Very large, round or top shaped white summer radish.			

"Please mail at once Icicle radish seed. The trial pound gave splendid results." Clarence Nicolai, Chelsea, Mich. Aug. 4, 1932.

Radish—Winter Varieties

Sow in August and store in moist sand for winter.

	¼ lb.	1b.	10 lb.
Chinese Rose.	\$.30	\$.90	\$ 8.50
About 5 inches long, red skin, with white flesh of best quality.			
Long Black Spanish.25	.70	6.50
Skin black, flesh white and very solid, 6 to 8 inches long.			
BLACK SPANISH TURNIP.25	.70	6.50
The roots are round or turnip shaped and grow very uniform in shape and size. The color is deep black without white streaks.			
CELESTIAL, or Chinese White.30	.85	7.50
Long, pure white, crisp, very mild.			

Rhabarber (Ger.) **RHUBARB or PIE PLANT** *Rabarbaro (It.)*

One ounce of seed will sow about 100 feet of row.

Myatt's Linnaeus. Early, large stalks. ¼ lb. 45c; 1 lb. \$1.40; 10 lb. \$13.00

Macdonald Rhubarb—Large Bright Red Stalks

This is the rhubarb that growers have been waiting for. The stalks are large and sturdy and a beautiful bright crimson color. They will sell on sight. The plant is strong and high yielding and does extremely well in dry weather. We are pleased to offer strong one year roots grown from divisions of the *original roots* which we obtained from the Macdonald College, Quebec, Canada.

We can offer roots only. Strong 1 yr. roots \$1.00 each; \$10.00 per doz. postpaid.

OTHER RHUBARB ROOTS. See page 39.

Salbei (Ger.) **SAGE** *Salvia (It.)*

One ounce of seed will sow about 200 feet of row.

BROAD-LEAVED. Oz. 20c; ¼ lb. 60c; 1 lb. \$1.75

When once started will last for years. Sow in open ground and thin to 6 inches apart.

Haferwurz (Ger.) **SALSIFY or Vegetable Oyster** *Sassefrica (It.)*

One ounce of seed will sow about 100 ft. of row.

MAMMOTH SANDWICH ISLAND ¼ lb. 60c; 1 lb. \$1.85; 10 lb. \$17.50

The largest and best variety.

Sauerampfer (Ger.) **SORREL** *Acetosa (It.)*

One ounce of seed will sow about 250 feet of row.

NARROW LEAVED (Special Strain). ¼ lb. 85c; 1 lb. \$2.75; 10 lb. \$25.00

This type is in demand on some markets. True seed of our own growing.

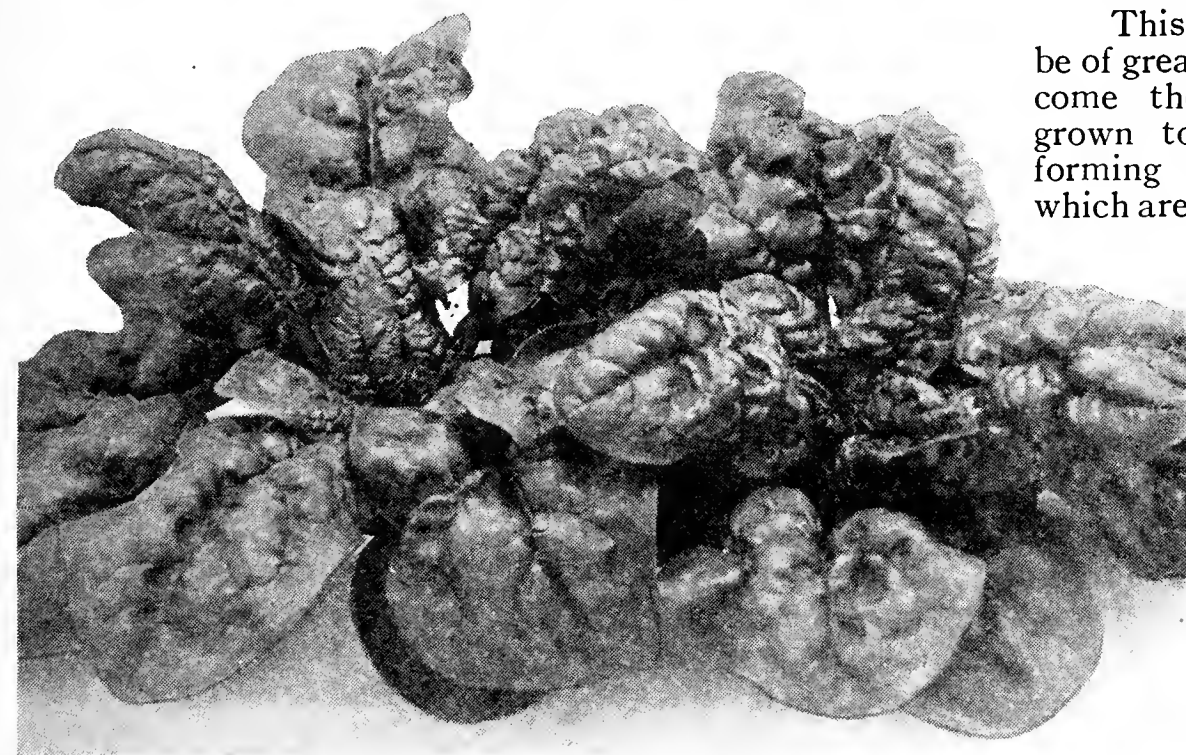

Improved Broad-Leaved. ¼ lb. 45c; 1 lb. 1.50; 10 lb. 14.00

Spinat (Ger.) **SPINACH** *Spinace (It.)*

Sow about 20 lbs. of seed per acre in rows.

PLEASE NOTE: We shall be glad to quote special prices to growers who use large amounts of spinach. Please write. 25 lbs. of any one variety will be furnished at the 100 lb. rate.

Long Standing Bloomsdale Spinach—The Best for Spring Sowing

This new spinach has proved to be of great value and has rapidly become the most popular spinach grown today. It grows quickly, forming large deep green leaves which are much curled and blistered.

It is like the best type of the old Norfolk Savoy or Bloomsdale, but is larger and darker green and stands fully a week longer without running to seed.

This spinach is one of the very best early varieties for spring sowing, and is also excellent for fall sowing for early spring use as it is very hardy. Our strain of this variety is exceptionally well bred,

every plant being of the true type with very large crumpled leaves of deep green color. We highly recommend it to all who grow spinach for market and shipping.

Lb. 35c; 10 lbs. \$2.65; 100 lbs. \$23.00. 25 lbs. or more furnished at the 100 lb. rate.

Nobel Giant Leaved Spinach

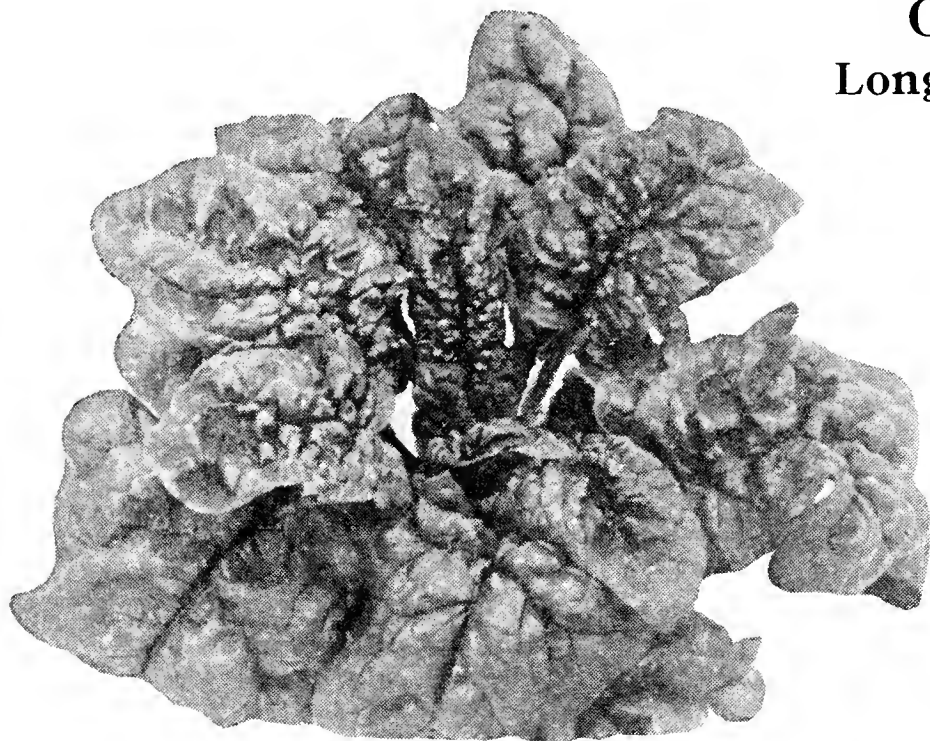

This new spinach grows very rapidly and attains a large size *very early*. The yield is consequently large and the fact that it is produced *very early* makes this one of the most profitable varieties for spring sowing. The plants stand remarkably well without bolting. The leaves are of the *largest size*, nearly smooth, thick and quite deep green. We advise gardeners to try this new variety. We are sure it will prove profitable.

Lb. 30c; 10 lbs. \$2.45; 100 lbs. \$22.00. 25 lbs. or more furnished at the 100 lb. rate.

SPINACH—continued

Old Dominion Spinach

Long Standing—Blight Resistant

Old Dominion Spinach

This new spinach meets the demand for a blight resistant variety which can be sown in the spring when the ordinary blight resistant kinds would bolt to seed. Old Dominion will stand longer than ordinary Blight Resistant, and is an excellent kind for shipping and market as it holds up extremely well when cut.

Our strain is of true stock developed in Virginia near Norfolk where only a blight resistant variety can survive.

This spinach has uniformly dark green leaves which are well crumpled and will yield large crops.

Lb. 40c; 10 lbs. \$3.40; 100 lbs. \$30.00.

Blight-Resistant Savoy Spinach—For Fall Sowing

We recommend this variety very highly for the fall crop.

Because of its blight-resistant qualities, it will yield large crops of very *fine deep colored, heavily curled spinach* in the fall, when other varieties are often a complete failure on account of blight. For spring sowing when blight does not ordinarily affect spinach we do not recommend this variety, as it will not stand at that time without bolting as well as some of the other kinds.

Our Fall Spinach Trials showing how BLIGHT-RESISTANT SAVOY stands without blighting. The two middle rows are Blight-Resistant. Picture taken in October.

Lb. 30c; 10 lbs. \$2.45; 100 lbs. \$22.00. 25 lbs. or more furnished at 100 lb. rate.

	lb.	10 lb.	100 lb.
LONG STANDING BLOOMSDALE. Best for Spring Sowing. See page 31.	\$.35	\$2.65	\$23.00
A great improvement over the old type as it stands much longer.			
HARRIS' BIG CROP30	2.45	22.00
Early, large leaved. Grows very rapidly and is large enough to cut sooner than most other kinds. Gardeners will find this a profitable early variety for spring sowing.			
KING OF DENMARK. Longest Standing35	2.75	25.00
This spinach will stand two weeks longer than any other kind except Long Standing Bloomsdale. The leaves are very dark green, quite thick and have small stems. On this account and because of the heavy yield this is one of the best varieties for canning.			
Eskimo of Giant Thick-Leaved30	2.25	20.00
An improved variety with very large, thick, dark green leaves; grows rapidly and stands well without running to seed. Hardy and an excellent kind for wintering over.			
OLD DOMINION. See above.40	3.40	30.00
New, longer standing, blight resistant variety.			
NOBEL GIANT-LEAVED. See page 31.30	2.45	22.00
A new large leaved early spinach of merit.			
BLIGHT RESISTANT SAVOY-LEAF. For Fall Crop. See above.30	2.45	22.00
A strain of Norfolk Savoy-leaf that is resistant to the leaf blight or "yellows".

	<i>¼ lb. will plant 50 hills; 3 to 4 lbs. of seed per acre.</i>	

Warren Squash

Improved Essex Hybrid

New England Strain

We have an exceptionally good strain of this fine old New England squash. The squash are medium size, very uniform in shape and heavily warted, with a distinct but not too large "button" at the blossom end. The flesh is fine grained and thick (see photo on this page) and the color a beautiful deep orange.

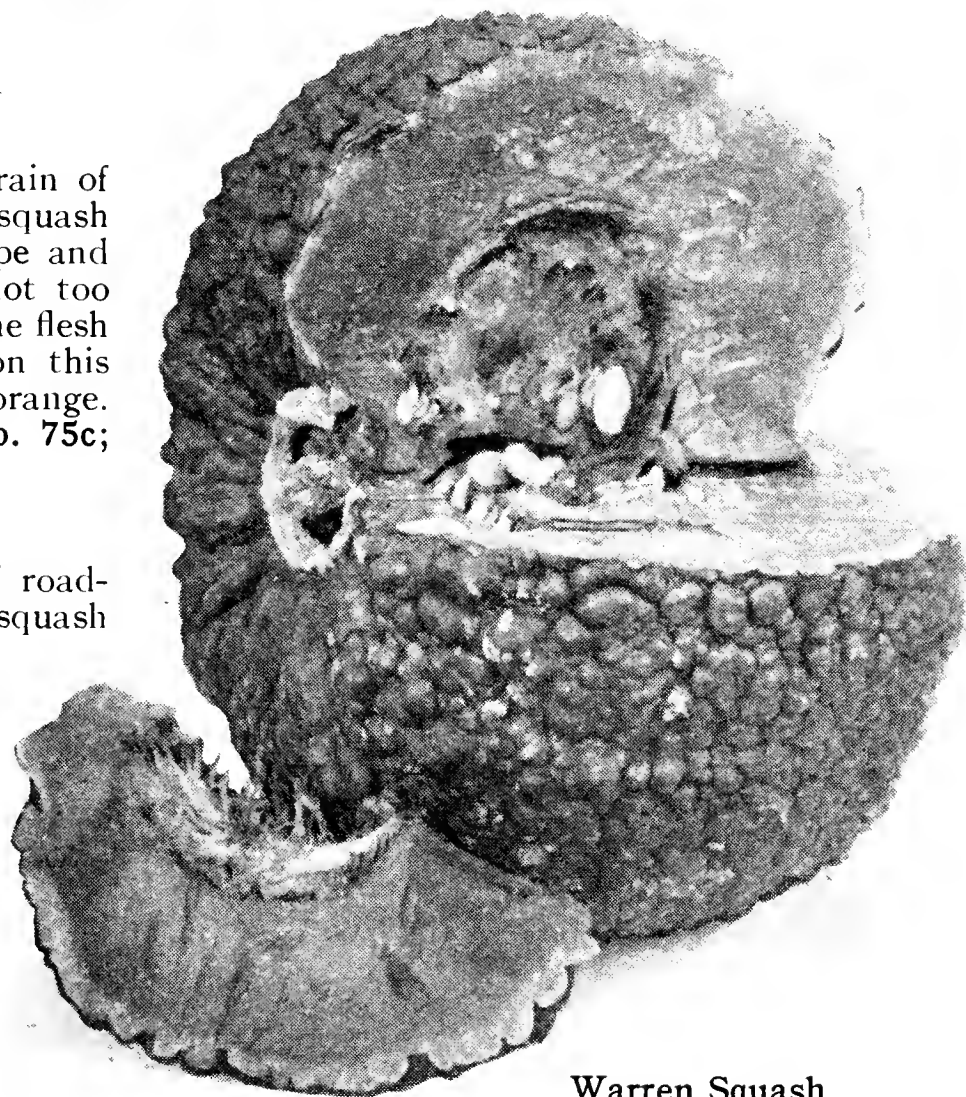

Seed of our own growing. ¼ lb. 75c; lb. \$2.50; 10 lbs. \$22.50.

Quality Squash

With the increasing popularity of roadside markets, a small to medium size squash of high quality has come into great demand. Harris' Quality Squash has proved a very popular variety.

The squash are of medium size; 7 to 8 inches in diameter, and an attractive heart shape. The outside color is dark green, with thick deep yellow flesh. This squash is of the finest quality, cooking up dry and sweet. Customers who try this kind always come back for more, which makes it a very profitable kind.

¼ lb. 75c; lb. \$2.50; 10 lb. \$22.50.

Warren Squash

Blue Hubbard Squash—Harris' Selected Strain

(See Photograph on Front Cover)

There has been a marked increase in the demand for this fine squash throughout the East and it is rapidly replacing the green varieties.

After working several years to get a pure strain of this popular squash we are now able to offer seed of our own growing from a crop that was practically perfect in respect to purity of color and shape of the fruit.

This seed can be relied upon to produce squash of which over 99 per cent are true to color and of the correct shape. We confidently believe that we have the finest and purest stock of Blue Hubbard that is grown.

The fruit of Blue Hubbard is larger than the common Hubbard and of an attractive gray-blue color, quite warted and of high quality. The squash often weigh 30 lbs. and the yield is very high.

The quality of the Blue Hubbard is so good that the squash has preference in the markets over other kinds. ¼ lb. 75c; lb. \$2.50; 10 lbs. \$22.50.

"We obtained wonderful results from your seeds last season, especially your Blue Hubbard Squash, Tendergreen Beans and Whipple's Early Corn, also Fordhook Limas." J. Harner, Dowgiac, Mich. April 23, 1932.

SQUASH continued on next page

WINTER SQUASH—continued

QUALITY. See page 33.....	\$.75	\$2.50	\$22.50
A winter squash of medium size and of very fine quality.			
BLUE HUBBARD Seed of Our Own Growing. See page 33.....	.75	2.50	22.50
A very fine large squash of the Hubbard type. The color is blue-gray.			
Boston Marrow25	.80	7.50
Popular fall squash, deep orange color. Used principally for canning and pies.			
WARREN, Improved Essex Hybrid—New England Strain. See page 3375	2.50	22.50
Large, flattened at ends. Color deep orange red. Thick flesh of high quality.			
DELICIOUS40	1.25	11.50
Smaller than Hubbard, but of finer quality, deeper green shell with orange flesh, dry and sweet.			
GOLDEN DELICIOUS40	1.25	11.50
Similar in shape to Delicious, but of a deep orange color outside. Flesh is thick, dry and of finest quality. An excellent yellow squash for roadside stands.			
HUBBARD—True30	1.00	9.00
Dark green fruit of high quality. We have a fine strain of this variety.			
IMPROVED WARTED HUBBARD40	1.25	11.50
Larger and more warted than the true Hubbard.			
Golden Hubbard30	1.00	9.00
The same shape as Hubbard but deeper orange yellow.			
Table Queen also called Des Moines, Acorn and Queen Ann40	1.25	11.50
Small dark green fruit 5 to 6 in. long, $4\frac{1}{2}$ in. in diameter, deeply ribbed and very hard. Flesh light yellow and of fine flavor.			

SUMMER SQUASH

$\frac{1}{4}$ lb. of seed will plant about 100 hills; 5 to 6 lbs. of seed per acre.

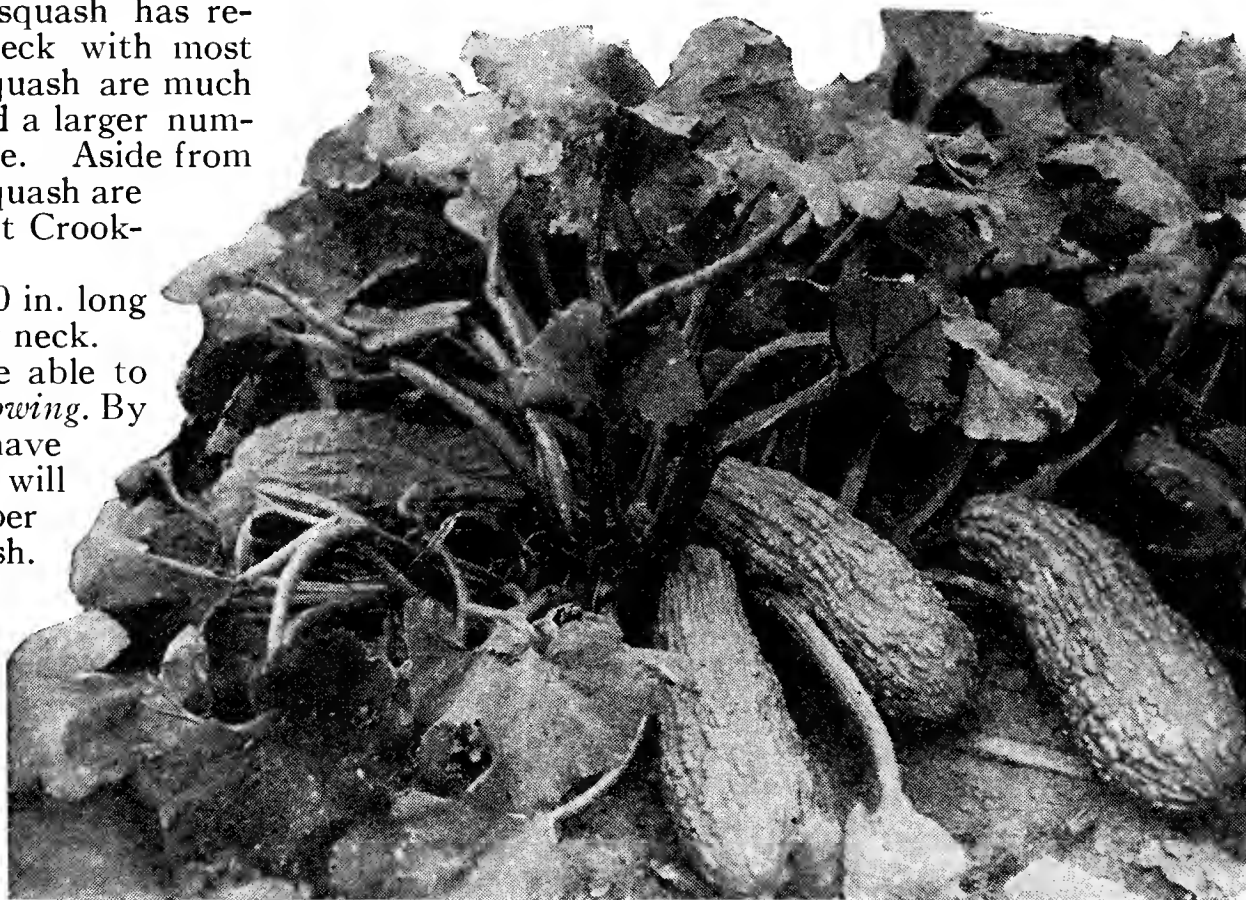

Giant Summer Straightneck Squash—Finest New England Strain

The Straightneck squash has replaced the old Crookneck with most growers because the squash are much more easily handled and a larger number can be put in a crate. Aside from the straight neck, the squash are identical with the Giant Crookneck.

The fruit is 15 to 20 in. long and with a thick meaty neck.

We are glad to be able to offer seed of *our own growing*. By careful breeding we have obtained a strain which will produce a very high per cent of straight squash. Those who saw the crop of Straightneck growing for seed on our farm this year declared it was the most uniform strain they had ever seen.

$\frac{1}{4}$ lb. 60c; 1 lb. \$2.00;
10 lb. \$19.00.

Giant Summer Straightneck Squash

	$\frac{1}{4}$ lb.	1 lb.	10 lb.
EARLY GIANT CROOKNECK	\$.40	\$1.25	\$11.50
Larger than the old Bush Crookneck and equally early. Our strain is very fine.			
GIANT SUMMER STRAIGHTNECK See above.....	.60	2.00	19.00
The same as Early Giant Crookneck, but without the curved neck of that variety.			
MAMMOTH WHITE BUSH SCALLOP also called "Cymling".....	.35	1.10	10.00
Large, flat, white fruit. Early maturing and even in size.			
Early Yellow Bush Scallop35	1.10	10.00
Similar to the white, except in color.			
ITALIAN VEGETABLE MARROW (Cocozele)40	1.25	11.50
Long, mottled green fruit of high quality. Our strain is very fine. Producing dark green squash of uniform length.			
Vegetable Marrow (English)40	1.25	11.50
The fruit is 8 in. to a foot long, 4 to 5 in. in diameter and of a creamy white color. It is used when half grown.			

*Liebesapfel (Ger.)***TOMATOES***Pomo d'oro (It.)**An ounce of seed will produce about 2000 plants.***Harris' Northern Grown Pedigree Strains**

We have for years made a specialty of growing tomato seed of the best possible quality here in the North on Moreton Farm. Since we are practically the only large grower of tomato seed in New York State we do not have a certification service and cannot offer "Certified Tomato Seed," but we grow our seed from pedigree stocks and in disease free fields on our own farm. This seed will be found equal to any and far superior to most that is usually sold. *We grow tomatoes for seed purposes only!* It costs more to grow tomato seed the way we do here in the North but the seed is worth much more.

Pritchard's Scarlet Topper**Also called "Pritchard"**

This new tomato is the last introduction of the late Dr. Pritchard of the United States Dept. of Agriculture who originated such varieties as Marglobe and Break O'Day, and it was considered by him to be the best of them all. We believe this to be the best of the many new tomatoes which have been brought out in the last few years.

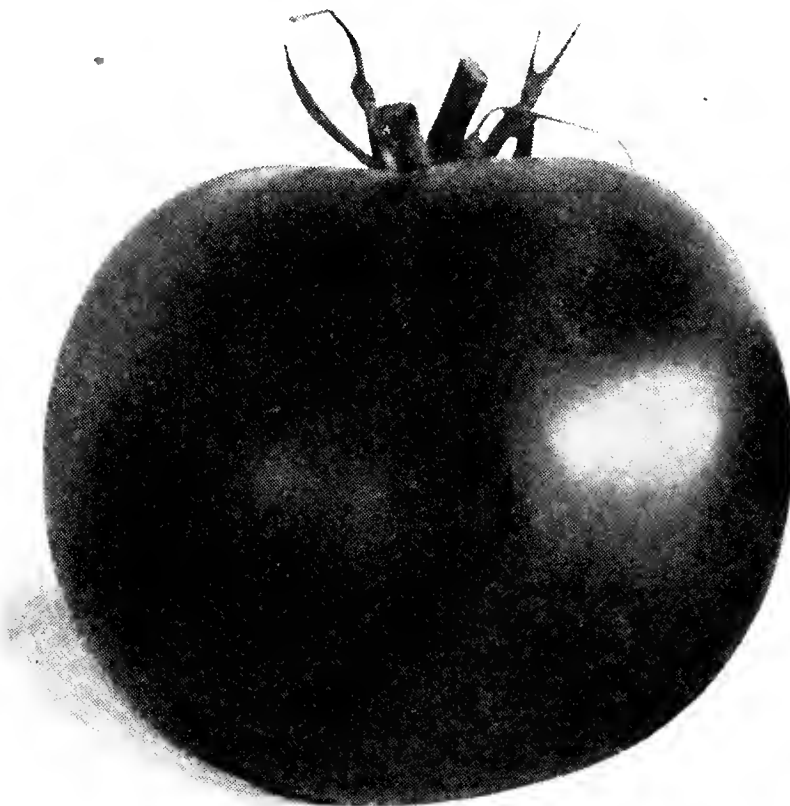

The fruit is medium early, ripening right after Bonny Best. The flesh is very solid with few seed cavities and the brilliant red color goes right up to the stem. This variety is free from cracks which gives the grower a large percentage of No. 1 fruit. The quality is extra fine being mild and without acidity.

The plants are robust but not of rank growth and bear heavily.

Market Gardeners find this variety sells readily and is a very profitable one to raise.

The grower for the roadside stand who has a "quality" trade will do well to make a planting of this kind as the customers will "come back for more" once they try it.

Oz. 75c; ¼ lb. \$2.30; lb. \$8.00; 5 lb. \$35.00.

Pritchard's Scarlet Topper Tomato

John Baer Tomato—Improved Strain

We have improved our stock of John Baer tomato by careful selection over a long period of years so that it is now much better than when first introduced.

The fruit is large, smooth, deep red and colors right up to the stem. The vines are vigorous and healthy and produce heavy crops, the yield being as great as any variety we raise.

We regard this variety as *one of the best medium early tomatoes for market or canning.*

Seed of our own growing from very choice fruit. We have never seen a better crop of tomatoes than our crop of Baer from which this seed came.

Oz. 50c; ¼ lb. \$1.35; lb. \$4.50; 5 lbs. \$20.00.

Bonny Best Tomato—Harris' Special Strain

This magnificent early variety should be largely planted. It is only a week later than Earliana and the plants produce enormous crops. The tomatoes are large and smooth as an apple and of a deep scarlet color, which extends right up to the stem. There is no trace of green tinge. There are practically no rough specimens and the fruit does not often crack. This is one of the best tomatoes for market and home use. We are sure there is no finer strain of Bonny Best than the seed we are offering. This is of our own growing from carefully selected plants, and will be found of the highest quality, producing the smoothest and most perfect fruit. No better seed of this variety can be bought at any price.

Oz. 50c; ¼ lb. \$1.35; lb. \$4.50; 5 lbs. \$20.00.

Harris' Success Tomato

This is one of the finest tomatoes which we know of.

The fruit is practically perfect—large, well colored, smooth, firm, and of exceptionally fine quality, being quite free from acidity when cooked. In addition it yields enormous crops, as large or larger than any other kind we raise. The fruit ripens as early as John Baer and Bonny Best is larger and more solid.

Market gardeners will find this one of the most profitable main crop varieties to grow. We do not know of any kind that yields such large crops of smooth handsome fruit.

Oz. 50c; ¼ lb. \$1.30; lb. \$4.25; 5 lbs. \$18.50.

TOMATOES continued on next page

TOMATOES—continued

Picking Tomatoes for Seed at Moreton Farm

Harris' Early STONE Tomato

The Stone has been considered for many years one of the very best tomatoes on account of its firmness and lack of acidity. By raising the seed in this northern latitude and making selections with special reference to earliness for a number of years we have obtained a strain that ripens *almost as early as Bonny Best and John Baer* and at the same time has retained its other good qualities.

For canning it is important to get a variety that is not acid and for this reason Harris' Early Stone is especially valuable for this purpose. The fruit is smooth deep red, solid, firm and very sweet. The yield is high and market gardeners with a discriminating trade will find this a very profitable tomato to raise.

Oz. 50c; $\frac{1}{4}$ lb. \$1.30; lb. \$4.25; 5 lbs. \$18.50.

Earliana Tomato—Harris' Extra Early Strain

We are sure that all our customers who have raised our special strain of Earliana tomato will agree with us that it is the *smoothest* and *best colored* stock of Earliana obtainable. There are other tomatoes offered under different names which are said to be earlier than Earliana, but we have found none to be any earlier and most of them are irregular in shape and not colored well.

Gardeners find this a most profitable tomato to raise. The early crop brings high prices and the fruit that ripens later is of such good shape and color that it brings almost as much as the later varieties.

We offer seed of *our own growing at Moreton Farm*. It is *Northern grown* as we are on the north border near Lake Ontario. Oz. 50c; $\frac{1}{4}$ lb. \$1.50; lb. \$5.00.

Canadian Tomato

We have grown and carefully selected this improved strain of Earliana which originated in Canada. From reports of growers and our own observations we are confident that this is one of the best all around early tomato where earliness, color, size and yield are considered.

The fruit is smooth and well colored right up to the stem. It is as early as Earliana and slightly larger, yields enormous crops and the fruit is better colored than any other tomato of this class. We have a very fine strain of our own growing which we can highly recommend.

Oz. 55c; $\frac{1}{4}$ lb. \$1.60; lb. \$5.50.

Marglobe Tomato—Blight Resistant

This blight resistant variety originated by the late Dr. Pritchard of the U. S. Department of Agriculture has been found valuable for canning, market and shipping.

The fruit is large, globe shaped, perfectly smooth, deep red, very solid and firm. The vines are vigorous and healthy and do not blight. Because of this fact the vines remain green until frost or until the whole crop is matured, so the late fruit is as good as the first to ripen.

We have grown this variety on our own farm since it was first released by the U. S. Department of Agriculture and have made careful selections each year until now we have a strain which is unsurpassed in yield, uniformity of color and size of fruit.

Oz. 50c; $\frac{1}{4}$ lb. \$1.35; lb. \$4.50; 5 lbs. \$20.00.

Large Italian Red Pear Tomato

This is a distinct variety 3 to 4 times as large as the ordinary Red Pear. The fruit is pear shaped, three to four inches long and grows in clusters of 4 to 7 fruits. This tomato has a distinct "flavor" and will find a ready sale among Italian buyers who use it for canning.

Pkt. 12c; $\frac{1}{4}$ oz. 60c; oz. \$1.75.

Comet Tomato—For Greenhouse and Trellis Growing

We can now offer a fine strain of *Comet Tomato* seed grown under glass. This is especially well adapted to greenhouse use and growing outside on trellises. The fruit is of good size, perfectly smooth, evenly colored and the plants are very prolific. Pkt. 25c; $\frac{1}{8}$ oz. \$1.00; $\frac{1}{2}$ oz. \$3.00.

SWEET MARJORAM20	.60	1.75
Easily grown from seed sown in the open ground in the spring.			
Lavender (True)45	1.20	4.00
The seed is difficult to get to germinate. Should be covered very lightly if at all. Perennial.			
Rosemary50	1.50	5.00
Perennial. Similar to Lavender.			
SUMMER SAVORY12	.30	1.00
Easily grown by sowing seed in the open ground in the spring. Plant grows about a foot high with small, narrow leaves, which are dried on the stems and used for seasoning.			
SAGE, Broad-leaved. See page 3120	.60	1.75
THYME50	1.50	5.00
Very largely used for flavoring. Will survive the winter if given a little protection.			
Wormwood45	1.20	4.00
A medicinal herb used largely for planting in poultry yards for chickens to feed on.			

CERTIFIED SEED POTATOES

Certified Seed. All the potatoes we offer have been certified after field inspection by the New York State Seed Improvement Association.

About Shipping.—The potatoes are shipped in sacks holding 150 pounds (2½ bu.) or barrels holding 180 lbs. (3 bu.). We can usually ship safely by the 25th of March, but not before, except to the Southern States.

Prices Subject to Change.—The prices here quoted are subject to changes of the market and to our acceptance on receipt of order. Lowest prices will be quoted by letter any time. Please state the kinds you are interested in.

	Single Bu.	Sack 150 lbs.	Bbl. 180 lbs.
WHITE GOLD. Certified Seed. Grow for quality	\$1.75	\$3.75	\$5.00
This is the new potato which has been so widely advertised. The potatoes mature early and resemble Green Mountain in shape. The eyes are shallow and the skin remarkable smooth and white. We have never eaten a potato that is of better quality and is so snowy white and attractive when cooked. This variety will bring many repeat customers at the roadside stand and market.			
White Gold. Second Size. Certified	1.40	3.25	4.40
From same certified field as above but not large enough for first size.			
IRISH COBBLER. Certified Seed	1.75	3.75	5.00
The most popular round white early potato.			
Irish Cobbler, Second Size. Certified	1.40	3.25	4.40
From same certified fields, but not large enough for first size.			
NO. 9 or HEAVY WEIGHT. Certified Seed	1.50	3.10	4.25
One of the heaviest yielding late potatoes we know of. Round, white, medium shallow eyes, vines very strong and free from disease.			
GOLDEN RURAL or RURAL RUSSET. Certified Seed	1.50	3.10	4.25
One of the very best potatoes, almost blight-proof, vines very strong and vigorous and produce immense yields of handsome round, white potatoes. We think larger crops can be raised with this variety than any other kind.			

Potatoes in Barrels.—We can ship potatoes in wooden barrels holding 3 bu. (180 lbs.) if so ordered at prices quoted above.

VEGETABLE PLANTS, ROOTS, ETC.

Orders for plants will be entered at any time and the plants sent when ready or when it is time to set them out. 500 plants will be supplied at the 1000 rate.

For those who use vegetable plants in large quantities, if ordered before Feb. 15th, we can grow to your order at special prices. Write for quotations on your requirements.

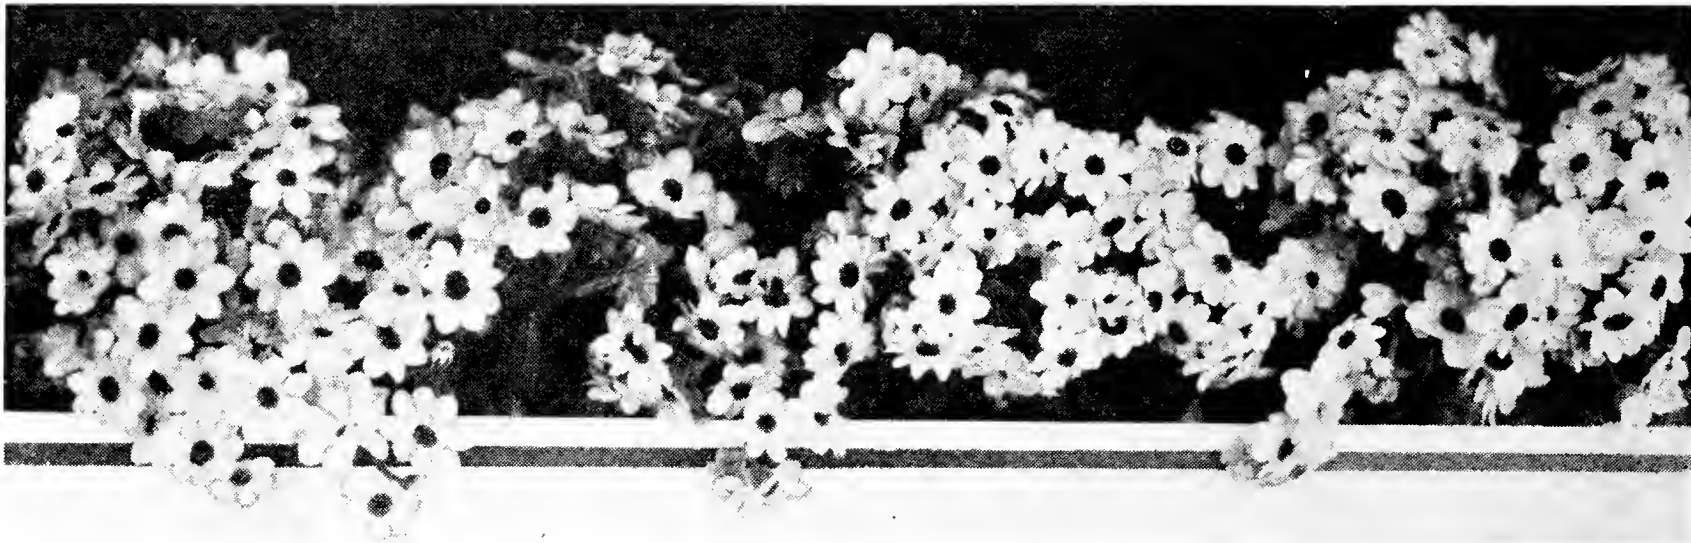

Shipping plants. At the prices given below the plants are sent by **express** at the expense of the purchaser (except those marked "postpaid"). If plants are wanted by parcel post an extra charge is made for postage as follows; To places in the 2nd zone (150 miles) 1c per lb., 3rd zone 2c per lb., 4th zone 4c per lb., 5th zone 6c per lb. 50 plants are furnished at the 100 rate, 500 at the 1000 rate

ASPARAGUS ROOTS, Mary Washington. The largest and best variety. It is rust-resistant and very vigorous. Stalks are deep green with purple tops. We raise asparagus roots quite extensively on our own farms and can furnish roots of very superior quality and freshly dug, which is very important. 1-year-old roots, first class. Weight 100-10 lbs., 1000-70 lbs.....	100	1000
<i>We strongly advise planting one-year-old roots, as they will make the best bed.</i>	\$1.50	\$ 8.00
HORSE RADISH, New Bohemian. ("Maliner-Kren.") Superior to common Horse Radish. Write for special price for large lots. Weight packed for shipping, 100-5 lbs., 1000-40 lbs.....	1.00	7.00
RHUBARB ROOTS, Myatt's Linneaus		
1-year-old. Weight 100 roots 40 lbs.....	3.50	25.00
2-year old. Weight 100 roots 75 lbs.....	5.00
New Macdonald. See page 31. Fine 1 yr. roots. \$1.00 each postpaid.		
BRUSSELS SPROUTS, Long Island Improved Dwarf. Ready June 20.....	.60	3.50
BROCCOLI. Green Sprouting (Calabrese.) Ready June 20. Weight 100-5 lbs., 1000-25 lbs.....	.75	4.50
CABBAGE PLANTS. Early transplanted plants, ready April 15 to May 15. Well hardened in cold frames and will stand considerable frost. Early Jersey Wakefield, Golden Acre Special, Copenhagen Market, Weight 100-5 lbs., 1000-25 lbs.....	1.00	8.00
Field grown plants, ready middle of June. All leading varieties. Weight 100-5 lbs., 1000-25 lbs.....	.40	2.50
CAULIFLOWER. Early transplanted plants ready from April 25 to May 15. Snowball and Super Snowball. Weight 100-5 lbs., 1000-25 lbs.....	1.25	10.00
Field grown plants, ready June 20. Snowball, Super Snowball and Catskill Snowball. Weight 100-5 lbs., 1000-25 lbs.....	.75	4.50
CELERY. Greenhouse grown plants ready May 1st to June 1st. Golden Self Blanching, Golden Plume and Florida Golden. Weight 100-4 lbs., 1000-25 lbs.....	1.00	8.00
Field grown plants, ready last of June. Varieties: Golden Self Blanching, Golden Plume, Florida Golden, Salt Lake, Easy Blanching. Weight 1000-25 lbs.....	2.75
EGG PLANT. Strong potted plants, Black Beauty. Weight, 100 plants 20 lbs. 50 plants \$2.75	5.00
SPANISH ONION PLANTS. Easy to set out and make excellent green onions, and also fine onions for fall sales. Varieties: White Spanish —mild and sweet; Riverside Sweet Spanish — Yellow. Plants grown from true strain.	1.50
PEPPERS. Strong transplanted plants, ready middle of May. Harris' Early Giant, Improved Squash, Harris' Earliest, California Wonder, Giant Cayenne. Weight, 100 plants 4 lbs., 1000-25 lbs.....	1.50	12.00
PEPPERS. Untransplanted Plants. Same varieties as named above. These plants should be grown in frames for two or three weeks before planting in the open ground. Ready April 25 to June 1. Postpaid.50	4.00
TOMATOES. Strong Transplanted Plants, well hardened, ready May 10 to June 25. Pritchard's Scarlet Topper, Extra Early Earliana, Break O'Day, John Baer, Bonny Best, Success, Stone, Ponderosa, (pink). Weight 100-6 lbs., 1000-30 lbs.....	1.50	12.00
TOMATOES. Untransplanted Plants. Same varieties as named above. Sturdy plants, grown especially for seedlings from seed sown very thinly. They should be set in frames and allowed to grow for two weeks or more before setting in the field. They are strong seedlings 3 to 4 in. high. Ready April 10 to May 15. Postpaid.50	3.50

HARRIS' FLOWER SEEDS

Are Best for the Grower

of Cut-Flowers, Bedding Plants and Hardy Perennial Plants

Myosotis, Harris' Royal Blue (See page 44)

If you are a florist, a gardener, or have a roadside market, you should, by all means, use Harris' Flower Seeds. It will be a long step toward better flowers and better sales. You can be sure of this because:

Harris' Flower Seeds Grow. Every lot has been carefully tested for vitality and the exact percentage of germination is marked on every package.

Harris' Customers Are Satisfied. We get a great many letters like these every year:

"I think your flowers and also all other seeds can never be duplicated elsewhere. I've never had any of your flower seeds fail to grow and the same with all farm seed we ever purchased from you in the past 18 years." Chas. VanScott, Macedon, N. Y.

"Your seeds have been very satisfactory and I am very much pleased with both flower and vegetable seeds and I will give you a good order in the spring." E. Cressey & Son, Rowley, Mass.

"I always like to plant your flower seeds for we can depend on them." Curwin J. Trone, York, Pa.

"We could buy them for less money, but I have developed strong confidence in you in the past 10 or 15 years that I have been buying your vegetable and flower seeds. The 25 lbs. of lawn grass seed is most amazing." Geo. McSpint, Kingston, N. Y.

"The seed you sent me germinated fine. I think 98%." Mrs. A. Hardaker, New Orleans, La.

"There is one thing I can say about your seeds,—they DO germinate." A. C. Black, Hilton Village, Va.

"Your seeds have always proved very satisfactory. You might perhaps be interested to know that my Zinnias raised from your seed took the blue ribbon at our local flower show." John A. Phillips, Wakefield, R. I.

"I have had the best of success with Harris Seeds. My new Golden Gleam Nasturtiums were beautiful. The Calendulas are a blaze of glory now and the Alpine Asters are coming fine. I believe the Long Spurred Aquilegia must have germinated 100%." Mrs. Arthur Bostwick, Harbor Beach, Mich.

Harris 1933 Recommendations

Although we can safely recommend every variety we offer, there are a few to which we would call your especial attention as follows:

SALVIA. Our Salvia has always been noted for its high germination. Our stocks of both **Bonfire** and **Splendens** are unusually good this year. In fact, our **Splendens** is as good as most stocks of **Bonfire**, and at a lower price.

COLEUS. Plants of extra fine Coleus always sell well. **Harris Extra Fancy-leaved Mixture** is absolutely the best stock of seed available at any price.

GOLDEN GLEAM NASTURTIUM makes a splendid cut flower in the greenhouse or outdoors and there will be a big call for potted plants this spring.

HARRIS' HARDY CARNATION plants are always in demand and we are the only source from which you can obtain the seed.

ASTERS. There are two varieties of our own growing which every grower of cut-flowers must have and they are much superior to other stocks of these same kinds. They are **Peerless Pink** and **American Branching White**.

GYPSOPHILA ELEGANS. No grower of cut-flowers can afford to be without plenty of **Gypsophila Elegans**, and our seed is of the best quality and lowest price.

POMPON ZINNIA. If you have never used Pompon Zinnias for cut flowers be sure to try them, especially the **Salmon Gem**. Sow it in a drill row and let them grow thick, making straight stems. **Pink Sunrise** is another splendid variety for cutting.

HARRIS' ASTERS

Harris' Treated Aster Seed is the Most Profitable to Grow

Harris' Grown Asters

To those interested in having the finest Asters for the market we can recommend our own growing most highly. They are the result of much painstaking effort to select for those characteristics which make them more desirable for cut flowers.

Improved By Selection

In the first place we have selected for a more vigorous plant with fewer small lateral blossoms making cleaner and stiffer stems as well as better flowers. We have also worked for a greater degree of perfection in the types of flowers themselves, always keeping in mind the needs of the florist.

Northern Grown

An additional benefit is that they are northern grown, making them acclimated for northern soil and weather conditions.

Disease Free

As our soil is free from wilt-disease and the seed treated before being shipped, you should have no trouble from wilt or stem rot, if your own soil has never been infected with the stem rot bacteria.

The following varieties are of our own growing and are in limited quantities.

W1066—PEERLESS PINK. The standard shell pink for florists. Large round flowers on long strong stems. Lg. Pkt. 20c; Oz. \$1.50.

W1601—AMERICAN BRANCHING WHITE. A splendid strain of non-lateral pure white and the best florists' white variety. Lg. Pkt. 20c; Oz. \$1.50.

W1604—AMERICAN BRANCHING AZURE BLUE. Large full double flowers of a bright azure blue on strong healthy plants. Lg. Pkt. 15c; Oz. \$1.00.

W1402—CREGO SHELL PINK. We have never seen such a wonderful stock of this variety. The flowers are immense and well rounded up with long twisted petals. The plants are vigorous and quite free from the usual small lateral flowers. Lg. Pkt. 25c; Oz. \$2.00.

HARRIS' CALIFORNIA GIANT ASTERS. Our own growing of this new race of mammoth Asters have been selected for earlier blooms in order to make them dependable and profitable for the northern florist. The plants are exceedingly vigorous and the flowers immense on very stiff long stems.

	Lg. Pkt.	Oz.
W1811—White	\$.30	\$2.50
W1812—Rose		
W1813—Peach Blossom		

W1513—ROSE KING. A bright shade of deep rose that is very effective. Very vigorous plants producing an extra large number of flowers on very long stems. Lg. Pkt. 15c; Oz. \$1.00.

W1515—VIOLET KING. A bright medium shade of violet-blue that is quite distinct. The same character of plant as Rose King. Lg. Pkt. 15c; Oz. \$1.00.

W1203—QUEEN OF THE MARKET ROSE. A bright deep rose, extra early and more vigorous than most other Queen of the Markets. Lg. Pkt. 15c; Oz. \$1.00.

CALIFORNIA WILT-RESISTANT ASTERS

A new strain of California Asters that has been carefully bred to be more resistant to the "wilt" or stem-rot. These have proven to be much more resistant where they are grown in California, and with several growers in other sections of the country.

The wilt-resistant characteristic has nothing to do with the disease known as "yellows." This is a disease carried by insects.

We offer the following nine varieties on the recommendation of the grower, where this disease has been known to destroy entire fields.

As we are not troubled with stem-rot or "wilt" on our own farms, we can not make any definite recommendations from our own experience. If you are seriously troubled with Aster wilt we suggest you try them.

	Lg. Pkt.	Oz.
WR-1078—Heart of France	\$.30	\$3.00
WR-1401—Crego White		
WR-1402—Crego Shell Pink

WR-1601—American Branching White ...		
WR-1602—American Branching Shell Pink		
WR-1603—American Branching Rose		
WR-1604—American Branching Azure Blue		
WR-1605—American Branching Purple ...		

Special Asters

W1078—HEART OF FRANCE. The most popular "red" Aster and still a favorite for the gardens. There is no other Aster to take its place. Lg. Pkt. 20c; Oz. \$1.75.

W1025—MORETON PINK. A beautiful shade of clear bright pink that has never been equalled. Lg. Pkt. 15c; Oz. \$1.00.

W1067—PEERLESS YELLOW. An interesting novelty that is wanted by many of your plant customers. Lg. Pkt. 25c; Oz. \$2.00.

W1010—NEW CALIFORNIA SUNSHINE MIXED COLORS. A new type of upright growing Aster with large single flowers, many of them with quilled centers. You should include these in your list of plants to sell. Lg. Pkt. 30c; Oz. \$3.00.

Aster Mixtures

W1000—Choice Mixture of Tall Varieties. This is an especially made up mixture of taller growing kinds including Royal, American Branching, Crego, King and Early American Beauty. It is well balanced as to colors and season, and is ideal for either plant trade or cut flowers. Lg. Pkt. 10c; Oz. 75c; ¼ Lb. \$2.50.

W1500—Harris' Six-Best Mixture. A mixture of the six Asters we especially recommend on page 57 of our general catalog. Particularly good for plant trade or garden. Lg. Pkt. 15c; Oz. \$1.50; ¼ Lb. \$5.00.

Our Cultural leaflet "Success with Asters" contains much helpful information about growing Asters and combating diseases and insects. A copy will be sent free on request with your Aster seed order.

Please Notice

NOTE—We do not furnish any ¼ ounces at less than 20c. Fractions of ounces will be supplied as follows:

GENERAL LIST OF ASTERS

From the long list of the different kinds of Asters that are offered on the market, we have chosen only the most desirable types and have carefully selected the best colors from each class.

For Roadside Stands and Local Markets we particularly recommend Giant Comet, Royal, Crego, American Branching, King, and California Giant.

For Shipping Flowers: Queen of the Market, Royal, American Branching, and Early Beauty.

Listed here in the order of their blooming.

QUEEN OF THE MARKET ASTERS. The standard extra early and one which has been profitably grown for years. The flowers are full double and desirable for shipping. Start indoors.

	Lg.	Pkt.	Oz.
W1201—White.....			
W1202—Shell Pink.....			
W1203—Rose. Harris Grown.....	\$.15		\$1.00
W1204—Azure Blue.....			
W1205—Purple.....			
W1200—Variety Mixture.....	.15		.75

GIANT COMET ASTERS. Medium sized full double flowers of the fluffy type on tall upright growing plants. Especially good for bedding and also fine for cutting.

	Lg.	Pkt.	Oz.
W1043—Salmon Rose. Harris Grown...	\$.25		\$2.00

Gardeners and Florists Can Absolutely Depend Upon Harris' Flowers

PANSIES

NEW SWISS GIANTS

- W3705—MAGNIFICENT MIXTURE.** No description can do justice to this new strain of Pansies. The enormous blooms measure three inches or more in diameter and the colors are unusual. Lg. Pkt. 45c; $\frac{1}{8}$ Oz. \$1.25; $\frac{1}{4}$ Oz. \$2.00; Oz. \$7.00.
- W3738—New Blue Swiss.** A solid blue with darker blue blotch. Lg. Pkt. 45c; $\frac{1}{8}$ Oz. \$1.25; $\frac{1}{4}$ Oz. \$2.25; Oz. \$8.00.
- W3739—New Red Swiss.** Same type as the blue, but a mahogany red color. Lg. Pkt. 45c; $\frac{1}{8}$ Oz. \$1.50; $\frac{1}{4}$ Oz. \$2.50; Oz. \$9.00.
- W3736—New Yellow Swiss.** Another of the type but a yellow color with black blotches. Lg. Pkt. 65c; $\frac{1}{8}$ Oz. \$3.00; $\frac{1}{4}$ Oz. \$5.00; Oz. \$15.00.

HARRIS' SPECIAL MIXTURE

- W3700—**This mixture is especially made of very fine varieties and choicest colors. We make a special point of this medium priced mixture. The flowers are all large, many ruffled and with bright colors predominating. Lg. Pkt. 25c; $\frac{1}{4}$ Oz. \$1.00; Oz. \$3.50.

GIANT TRIMARDEAU PANSIES

- W3701—Mixed Colors.** A high grade mixture of choicest colors of large-flowering Pansies. Large Pkt. 15c; $\frac{1}{4}$ Oz. 30c; Oz. \$1.00.

GIANT RUFFLED PANSIES

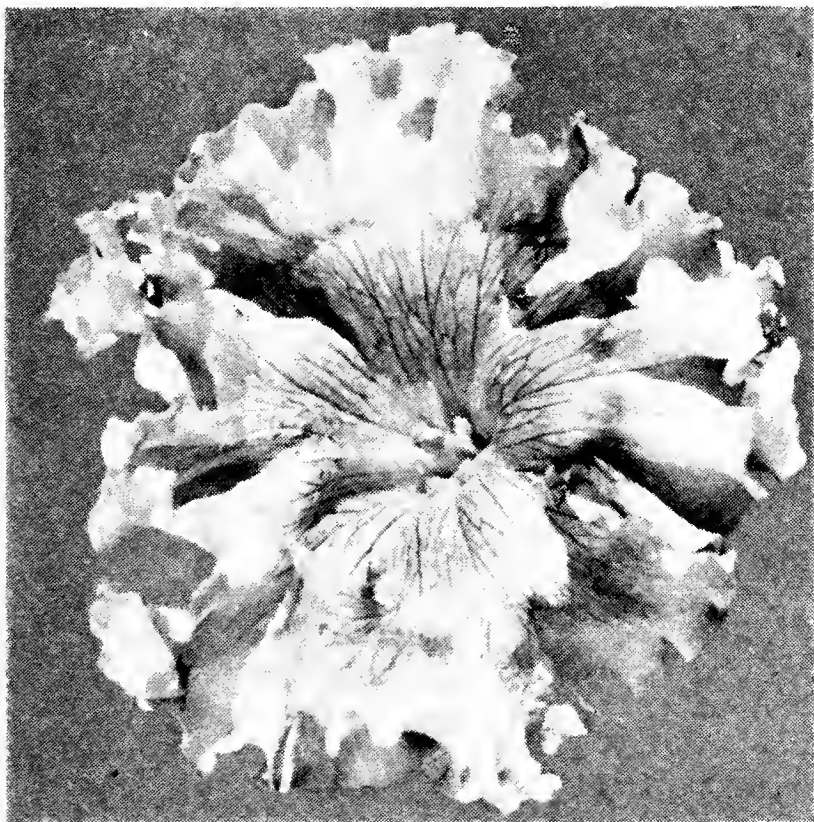

- W3702—**The flowers of this mixture have fluted or ruffled petals which adds much to the beauty of the wonderfully rich colors. Large Pkt. 25c; $\frac{1}{8}$ Oz. 60c; $\frac{1}{4}$ Oz. \$1.00; Oz. \$3.00.

SEPARATE COLORS

	Lg. Pkt.	Oz.
W3729—Orange of St. Knud.	.25	\$2.50

W3763—VIOLAS, Yellow.	
W3764—VIOLAS, Blue.	
W3760—Mixed Colors.	1.25
W3765—JERSEY GEM.	Ret. Pkt. 40c

Ruffled Giant Petunia

PETUNIAS

- W3800—HARRIS' PERFECTION DOUBLE.** Our strain of Double Petunias is exceptionally fine. The flowers are fringed and in a splendid range of colors. 200 seeds 60c; 500 seeds \$1.00; 1000 seeds \$1.75; $\frac{1}{4}$ oz. \$3.50.
- W3801—RUFFLED GIANTS OF CALIFORNIA.** An extra fine strain of this well known ruffled Petunia. They come in the best possible range of colors, many of them being blotched. 500 seeds 45c; 1000 seeds 75c; $\frac{1}{8}$ oz. \$2.25; $\frac{1}{4}$ oz. \$4.00; $\frac{1}{2}$ oz. \$7.00.
- W3806—DWARF RUFFLED GIANTS OF CALIFORNIA.** A strain with a more dwarf habit of growth making them more desirable for potting and bedding purposes. 500 seeds 50c; 1000 seeds 90c; $\frac{1}{32}$ oz. \$2.00; $\frac{1}{16}$ oz. \$3.50; $\frac{1}{8}$ oz. \$6.00.
- W3803—SINGLE FRINGED MIXED.** A large flowering heavily fringed type saved from the largest flowers. This is a highly colored strain. 500 seeds 30c; 1000 seeds 50c; $\frac{1}{8}$ oz. \$1.25; $\frac{1}{4}$ oz. \$2.00.
- W3816—PURPLE PRINCE.** A deep velvety violet color slightly ruffled and 100% true. A very popular variety. 500 seeds 60c; 1000 seeds \$1.00; $\frac{1}{32}$ oz. \$3.50.
- W3813—THEODOSIA.** A medium sized fringed pink heavily veined and with a contrasting yellow throat. A most desirable color. 500 seeds 50c; 1000 seeds 90c; $\frac{1}{32}$ oz. \$2.00.
- W3822—DOUBLE ROSY MORN.** A double form of the popular pink bedding petunia. Although this is a new variety, it comes a large percentage true. 500 seeds 60c; 1000 seeds \$1.00; $\frac{1}{32}$ oz. \$3.50.

Hotkaps
 New Method of
 Plant Protection

In order to grow profitable vine crops, the grower must do everything possible to insure the greatest yield of early fruit at a minimum cost. The use of **Hotkaps** has proved a decided advantage in growing these crops.

Hotkaps are simply scientifically constructed wax paper cones, which are placed over the plant or hill of seeds in the field. They act as miniature hot houses, enabling the grower to set out his plants or plant his seed as soon as the ground gets warm, as they afford perfect protection from frost, wind and beating rains. Hotkaps also protect the young plants from insects, such as the striped beetle which does so much damage to young plants. It also prevents the ground from baking around the plant. **This makes for earlier and better fruit.**

We have used hotkaps on our own farm for a number of years and find the cost is many times repaid in earlier fruit and better yields. Growers of early sweet corn find they can plant their seed earlier without danger of the plants being killed by late frost.

*"Last spring I purchased some of your Bender's Surprise melon seeds. Some were started in the greenhouse, others under **Hotkaps** and the remainder just planted without **Hotkap** protection. Those started in the greenhouse and under **Hotkaps** are about equally as far advanced ahead of those just sown in the field. Next year we're starting all of them under **Hotkaps**." Fred H. Zautner, New Scotland, N. Y. Aug. 16, 1932.*

New Low Prices of Hotkaps for 1933

These new low prices make Hotkaps more economical to use than ever!

PRICES—250 with special setter and tamper \$3.50 (weight 9 lbs.) 250 without setter and tamper \$3.20; 500 with setter and tamper \$5.50; 500 without setter and tamper \$5.20; 1000 Hotkaps without setter and tamper \$9.75 (weight 28 lbs.) 5000 \$9.60 per 1000; 10,000 \$9.50 per 1000 not prepaid. Write for special price on larger lots.

For full details and prices of Hotkaps in smaller quantities see our General Retail Catalogue.

Steel Hotkap setter and tamper—\$2.25 (weight 3 lbs.)

Folder giving full description and directions for using Hotkaps will be sent to anyone interested on request. Please write.

Hotkaps are easy to set out. The method is shown above and full directions are sent with each lot of Hotkaps.

Prevent Damping Off Stop Seed Rotting in the Ground

We have found on our own farm and in our greenhouses that it pays to use Semesan. Corn of high germination will often when the weather is unfavorable lie in the ground and not sprout. On our own farm Semesan treated seed corn has grown 100% better than untreated seed under adverse conditions and doubled the crop. In the greenhouse we find that sprinkling the soil with Semesan solution **controls damping off**. The process of treating seed and soil is so easy, and the cost so small that no grower can afford not to take these simple precautions to **Insure Better Crops**.

SEMESAN is available in four forms:

SEMESAN—Can be applied in either the liquid or convenient dust form to prevent or control effectively a great variety of parasitic diseases and fungoid growths borne by seeds, bulbs, seed pieces, plants, grafts and soils. Semesan is harmless to seed and plant life but extremely poisonous to disease and fungous organisms. It generally also hastens germination. 1 oz. makes 3 gal. of solution. 2 oz. 50c; 1 lb. \$2.75; 5 lbs. \$13.00; 25 lbs. \$56.25.

SEMESAN Jr.—A cheap simple and sure dry dust disinfection for both field and sweet corn seeds. Two ounces will treat 1 bu. of seed corn. New Low Price: 4 oz. 40c; 1 lb. \$1.50; 5 lbs. \$7.00.

SEMESAN Bel (New Improved)—One pound of the New Improved Semesan Bel will treat 60-70 bushels of cut potatoes. It possesses great disease control properties especially in respect to Rhizoctonia and seed-borne Scab. The "Instantaneous Dip" method of applying new Semesan Bel saves time and labor. 4 oz. 50c; 1 lb. \$1.75; 5 lbs. \$8.00; 25 lbs. \$31.25.

CERESAN—Has proved an effective dust treatment in controlling seedborne diseases of wheat, barley, oats, etc. Will not injure seed or grain drill. Only 2 oz. required to treat a bushel of wheat or rye, and 3 oz. to a bushel of oats. 1 lb. 75c; 5 lbs. \$3.00; 25 lbs. \$12.50.

Write today for booklet describing the use of Semesan Products. They will be sent free.
